REPORT ON PUBLIC INSTRUCTION IN BOMBAY, 1920-21

CHAPTER I

General Progress

Introduction.

1. The year has been a period of steady progress in spite of non-co-operation. The number of public institutions and the number of pupils attending them again show a very substantial increase, while there was a further large increase in expenditure. The graphs attached to this chapter show the growth in the numbers of institutions and pupils and in expenditure during the last 12 years, as also the sources from which the expenditure was met.

Notable events.

2. A prominent feature of the year was the non-co-operation movement which swept over the country at the end of 1920 and was at its greatest intensity in the early months of 1921. It was in Gujarat that the movement had most effect on education, while parts of Sind were considerably affected at the outset. Although the movement owed its origin to political causes, it was assisted to a considerable extent by the general feeling that our educational system is defective in that the education it imparts is too literary and not sufficiently practical. This is not the place to discuss the extent to which vocational or pre-vocational instruction can usefully be given side by side with general instruction whether primary or secondary. It might not, however, be amiss to observe that, though the syllabus of the Government School Final Examination, which was in existence from 1905 to 1918, made provision for such practical subjects as Shorthand and Type-writing, Drawing, Carpentry, Book-keeping and Commercial correspondence, and Agriculture, these subjects were taken by few or no candidates, while the experience of the few schools which offered an alternative course (chiefly of a commercial nature) in the higher standards was far from encouraging. The fact is that until the last few years there has been little or no demand for education of a practical character. The most unsatisfactory feature of the non-co-operation movement has been the unsteadying effect it has had on the minds of the population of school-going age at the very time when concentration of thought and interest is most essential, coupled with the loss of respect for constituted authority, whether that of the parent, of the school, or of the state, which the movement has entailed. The net result of the agitation has been that 14 secondary schools and 25 primary schools non-co-operated. There were 6 resignations from the staffs of Government Colleges and 17 from those of Secondary, Training, and Special (Government) institutions. Five hundred and seventy-six students withdrew from colleges and 1,684 from secondary schools (of all kinds) but a considerable proportion of these returned after a short while. The Municipalities of Ahmedabad, Surat, and Nadiad refused Government grant and determined not to submit to Government inspection. Considering the fact that the total number of public institutions and the pupils attending them have increased by 251 and 43,117 respectively, it will be seen that the non-co-operation movement has produced little permanent effect on public instruction in this Presidency.

Council Resolutions.

3. The following resolutions dealing with educational subjects were passed by the Legislative Council :- (1) that all pupils belonging to the depressed classes studying in Local Board Primary schools up to the Vernacular fourth standard be supplied free with school books, slates, and pencils as far as funds permit ; (2) that the present procedure relating to the official approval of the plans and estimates for buildings for primary schools is unnecessarily cumbrous and requires to be revised so as to facilitate the speedy construction of such buildings ; (3) that grants for primary education to Municipalities unable to meet the necessary increased expenditure should be raised for a period of two years from one-half to two-thirds of their annual expenditure.

As regards the first resolution, provision has been proposed in next year's budget. As a result of the second resolution, Government have sanctioned a

revised procedure for the approval of plans and estimates. As regards the third resolution, Government have passed orders sanctioning the payment of grants accordingly.

Institutions

4. The main features of the year as revealed by the statistics may be summed up as follows :—The number of institutions has increased by 506 to 15,214. Public institutions have increased by 251 to 13,718 and Private institutions by 255 to 1,496. Of the public institutions, 11 are Arts and 7 Professional colleges, and 475 Secondary, 13,018 Primary, and 207 Special schools. The 13,018 public primary schools were distributed among 10,167 out of 26,258 inhabited towns and villages—an increase of 304 and 260 respectively. The number of pupils under instruction has increased

Pupils

by 56,952 to 949,827. Those in public institutions have increased by 43,117 to 905,000 and those in private institutions by 13,835 to 44,827. There are in all 760,013 male and 189,814 female pupils under instruction. The population under instruction in public institutions was per mille 71 males and 20 females, or 47 for

Caste or creed

males and females combined. Of the total under instruction 4,829 are Europeans and Anglo-Indians, 28,538 Indian Christians, 114,257 Brahmins, 587,905 Non-Brahmin Hindus (including 37,654 Depressed classes), 192,131 Mahomedans, 15,863 Parsis, 18 Buddhists, and 6,286 others. The expenditure on public instruction

Expenditure and sources of income

increased by Rs. 28½ lakhs to Rs. 263½ lakhs. Of the total expenditure, 57 per cent was defrayed from Provincial revenues (including grants from Imperial funds), 5 from Local Board Funds, 10 from Municipal Funds, 14 from fees, 4 from endowments, and 10 from subscriptions and other sources. The opening and closing balances of grants received from the Government of India were respectively Rs. 45,71,851 and Rs. 44,96,972. Of the latter, Rs. 16,65,794 (Rs. 28,390 recurring and Rs. 16,37,404 non-recurring) are unpledged. The expenditure from these grants was Rs. 11,22,023 (Rs. 8,49,528 recurring and Rs. 2,72,495 non-recurring). No new grants were received during the year from the Government of India.

CHAPTER II

ADMINISTRATION

Various cadres

5. The strength of the several educational services on 31st March, 1921, stood as under :—

		Posts.
Indian—Administration	18	58
Indian—Collegiate Branch	40	
Provincial—General	30	52
Provincial—Collegiate Branch	22	
Subordinate—Inspecting	177	1,374
Subordinate—Teaching	702	
Subordinate—Clerical	385	
Subordinate—Others	110	
Miscellaneous appointments in all the three branches	27	27
Total		1,511

The total number of teachers in vernacular schools (Government, District Local Board, and Municipal) was 24,773. Thus the total establishment of the Department (excluding menials) was 26,284. During the year under report 8 more men were promoted from the Provincial Educational Service to the Indian Educa-

Indians in the Indian Educational service

tional Service—3 were taken up as direct recruits and 5 were promoted from miscellaneous appointments. Indians now form 38 per cent in the Indian Educational Service. Of the 16 admitted to the Indian Educational Service during the year, 15 were Indians.

Revision and reorganization

6. Since the close of the year orders have been issued on the revision of the scales of pay for men in the new Bombay Educational Service, for clerks, and for teachers of Languages, Drawing, and Drill. The minimum pay of primary teachers was raised during the year to Rs. 20 for unqualified assistants, Rs. 23 for qualified but untrained assistants, and Rs. 25 for head masters and 1st year

trained assistants. The revision of the pay of the Women's Branch of the Bombay Educational Service, of Secondary Teachers and Assistant Deputy Educational Inspectors, of Vernacular 2nd and 3rd year Trained Teachers, and of Menials is still under consideration.

Direction and Inspection.

7. Mr. J. G. Covernton was in charge of the office of the Director of Public Instruction throughout the year. Mr. K. G. Joshi was Assistant Director of Public Instruction except during his absence on short leave, when Messrs. A. C. Miller and F. W. Marrs did duty as Assistant Director of Public Instruction. A new post of second Superintendent has been temporarily sanctioned; the duties attached to the post are those of Finance Superintendent. The only change of Inspectors during the year was that I relieved Mr. Grieve in Sind in January. I can say from my own knowledge that all the Inspectors are overworked, in spite of the creation of the new Bombay Division in April, 1920. Not only has there been an enormous increase in the number of educational institutions, but the interest taken by the general public in educational matters has necessarily led to a great increase in correspondence, with the result that the Inspectors often have not time to see to details of administration which really require attention. The following extract from the report of the Educational Inspector, Central Division (Mr. Hesketh) is to the point:—

"It may be of interest to record that 50 years ago the pay of the Educational Inspector, C. D., was Rs. 1,500, and he had as an assistant a member of the Indian Civil Service who ultimately became Member of Council in charge of the Educational portfolio. The inward register for that year shows that 3,600 letters only were received, an average of less than 10 a day. The maximum pay of the Educational Inspector was Rs. 1,500 down to 1919, since when it has been raised to Rs. 2,000 including Rs. 250 as overseas allowance."

A new post of Deputy Inspector of Visual Instruction, and 9 additional posts of Assistant Deputy Educational Inspectors, have been created. Inspecting officers have considerably more schools and pupils to inspect than the scale laid down. With the growth of office work, Deputy Educational Inspectors have a hard task in the discharge of their complex duties. An undue part of the time of the Deputy Inspectors is taken up with the preparation of the pay bills of District Local Board teachers and their legitimate work suffers accordingly. The question of altering the system of accounts is under consideration. In this connection I quote from Mr. Hesketh's Report:—

"Last year I referred to the growing complexity of administration of Local Board Schools, especially as regards finance. The system of aiding the Local Boards is in a chaotic condition. All increased expenditure has to be met by special grants from Government of which there are now about 15 different varieties. The preparation of separate estimates and the attempts to keep separate accounts for these grants have made the work of the Deputy Educational Inspectors and of the Educational Inspectors almost impossible. It must be remembered that the primary teachers are subject to the same elaborate rules of the Civil Service Regulations as gazetted officers. The position is made more complex by the fact that they are treated as on foreign service and pension contribution has to be paid on their account. It may be imagined, therefore, that Deputy Educational Inspectors, with over 1,000 teachers to pay every month, have no light task. Some success has attended our efforts to accelerate the distribution of pay. Various proposals have been put forward for simplifying the administration, but I doubt whether much good will result from tinkering at the present system, which was devised for a handful of schools and teachers."

During the latter part of the year additional work was thrown on the Inspecting Staff by the Non-co-operation movement. To cope with the ever-growing work, and to maintain efficiency of supervision, the controlling agency requires to be further strengthened in almost all districts. The cost of Direction was Rs. 1,11,109 and that of Inspection Rs. 10,63,139. The two together formed 4·5 per cent of the total expenditure on public instruction.

Cost of Direction and Inspection.

Scout Commissioner.

8. A post of Provincial Scout Commissioner has been created (for two years in the first instance) for the organisation of Boy Scouts in the Presidency, and Mrs. A. C. Miller, I.E.S., has been appointed to it.

Conferences.

9. A conference of Divisional Inspectors was held at Poona in July, 1920. Among the questions discussed were the opening of new primary schools, free

building grants, and office management. Conferences were also held by inspecting officers and teachers for the discussion of educational questions.

Relations with Boards, etc.

10. The need for the maintenance of close and cordial relations with all local bodies, with the District Officers, and the officers of other Departments is continually impressed on the Inspecting Staff. With the introduction of non-official Presidents to most of the District Local Boards occasion for disagreement has undoubtedly increased, but no serious friction has been reported.

CHAPTER III

The University

Affiliation and students

11. The number of colleges affiliated to the University of Bombay has increased by 1 to 21, but the number of students decreased by 401 to 8,533. Professional colleges remained unchanged at 5, but the students decreased by 101 to 2,352. All the five Professional Colleges are Government institutions. Three of them, those for Law, Commerce, and Engineering, are under the control of the Educational Department. An account of these will be found in Chapter VII. The remaining two, the Medical and Agricultural Colleges, are under their respective Departments.

Expenditure

12. The total expenditure of the University was Rs. 3·75 lakhs, against Rs. 3·68 lakhs in the previous year. Examinaton fees increased by Rs. 41,359 to Rs. 2,51,078.

Examinations

13. The results of the more important examinations are shown in Appendix A.

Important events and features

14. The rules were altered to allow candidates to take Honours in French German, Avesta, and Pahlavi at the B. A. Examination. Portuguese was recognised as a second language at the University Arts Examinations. Sociology was introduced into the curriculum of the M. A. Examination as one of the alternatives in the groups of History and Philosophy. The requirement of the possession of an Arts Degree in addition to the Engineering Degree for appearance at the M.C.E. Degree Examination was removed. Owing to the increasing importance of the study of the vernaculars it was considered necessary to place them under the direction of a separate Board of Studies. The School of Economics and Sociology is reported to be doing good work under Professor Geddes, assisted by Mr. S. N. Pherwani as Assistant Professor. Endowments have been accepted from the Indian Community in Japan for the foundation of a scholarship to perpetuate the memory of the late Dr. Dadabhai Navroji, to be awarded every year to the Indian girl who obtains the highest number of marks in English at the Matriculation Examination, and from Mr. E. Dalgado M.A. (Oxon), Solicitor, for the award of a scholarship to the candidate at the Matriculation Examination who obtains the highest number of marks in Portuguese. The Matriculation examination of all other Indian Statutory Universities and the Mysore University was recognized unconditionally as equivalent to the Matriculation Examination of the University of Bombay. Dr. F. G. Selby, the Rev. Dr. D. Mackichan, and Professor P. Geddes, were appointed delegates to represent the University at the Congress of the Universities of the Empire held at Oxford. A special convocation of the Senate was held to confer the honorary degree of the Doctor of Laws on the Right Honourable Lord Sinha, the Honourable Sir N. G. Chandavarkar, and the Honourable Sir C. H. Setalvad.

State Technical scholarships

15. The question of provincialising State Technical Scholarships is under consideration by the Government of India. Mr. Modak's scholarship (for Sanitary Engineering and Sewage disposal) has been extended up to 31st March, 1922. Mr. M. B. Hudlikar returned from England and joined Messrs. Narvekar, Hudlikar and Company, Managing Agents of the Mysocrome Tanning Company, Limited, Bombay.

Provincial Advisory committee

16. The Advisory Committee transmitted 61 applications for admission to Universities, of which 53 were accepted. The number of enquiries made in writing

increased by 62 to 681, including 57 for American Universities. These inquiries concerned the following subjects :—Engineering (83), the Indian Civil Service (63), Medicine and Cambridge Degrees (50 each), the Bar (45), Technical Courses (40), Oxford Degrees (35), the Royal College of Physicians and Surgeons (27), London University Degrees (23). On the other hand there were fewer inquiries by personal visit. 657 Prospectuses, etc., relating to foreign institutions were issued to 540 students. The Committee knew of 53 students having gone to England during the year. Of these 16 accepted the guardianship of local advisors recognized by Government.

17. The University Company of the Indian Defence Force had 134 men on its rolls, of whom 97 belonged to Arts Colleges, the Fergusson College, Poona, having 56 to its credit. *University Corps Indian Defence Force*

CHAPTER IV

Arts Colleges

18. The number of Arts Colleges in British Districts increased by 1 to 11, of which 4 were Government, 6 aided, and 1 unaided but recognised. The M. T. B. Arts College, Surat, was taken on the aided list. The Karnatak Education Society established a new college at Dharwar teaching up to the Intermediate Examination. This college has remained closed since the end of the academical year under report and it does not seem that it is likely to be re-opened in the near future. In the Government colleges the number of Professors in the Indian Educational Service was increased from 15 to 24. The number of students decreased by 176 to 5,021, including 168 women against 140 in the preceding year. The Non-co-operation movement was responsible for the withdrawal of 539 students and 12 teachers. There were 1,239 students in Government, 3,662 in aided, and 120 in unaided colleges. St. Xavier's had 1,177 on its rolls, and Fergusson 1,058. Of the female students, 115 were in Bombay, 30 in Poona, and the rest at colleges in other towns. *Colleges and Students*

19. The total expenditure increased by Rs. 2 lakhs to Rs. 12 lakhs, of which 39 per cent was met from Provincial Revenues, and 40 per cent from fees. Government grants to aided colleges increased by Rs. 15,688 to Rs. 1,48,126. The average annual cost per student in Government colleges was Rs. 330·4, of which Rs. 226·8 was borne by Government. The average cost per student in non-Government Colleges was Rs. 195·3, of which Rs. 40·6 was borne by Government. The average fee per head was Rs. 90 per annum in Government colleges, and Rs. 93·9 in non-Government Colleges. The expenditure on scholarships increased by Rs. 20,918 to Rs. 70,731. *Expenditure*

20. Of the 5,021 students, 1,600 (including 2 girls) resided in hostels, against 1,301 (including 3 girls) in the previous year. Proposals made for financial assistance to hostels have been approved by Government. The health of the students is reported to have been good on the whole. *Hostels*

21. Of 29 successful candidates at the M.A. Examination 1 gained first class honours, of 7 at the M. Sc. Examination 1, of 267 at the B.A. Examination 18, and of 54 at the B. Sc. Examination 9. *Examinations*

22. The number of teachers has increased by 16 to 244. The average number of students per teacher is 21. As things stand at present, tutorial work of a really high order in the larger colleges is difficult specially in the lower classes because the members of the staff cannot devote sufficient time to individual students. Mr. Turnbull (Deccan College) remarks. *Tutorial work, College teaching and Subjects*

> "As to tutorial work, we do what we can with the small numbers on the staff in proportion not to the total number of students but to the large number of different classes."

Mr. Robertson (Gujarat College) is opposed to the tutorial system except for Honours work and for practical work in Science. Mr. Covernton refers to the difficulty of the method in language teaching while it is more successfully applied in Mathematics.

Discipline and College life

23. Though no serious disturbance occurred, life in the colleges was undoubtedly affected by the non-co-operation movement and discipline rendered more difficult. As stated above, 539 left the various colleges on account of non-co-operation. Mr. A. L. Covernton (Elphinstone College) observes :—

"Throughout the whole year I noticed a dullness and absence of life in the College, the students showing less interest in their studies and being less active in participating in the work of the various societies and in sports. Such time and attention as remained over from a rather perfunctory study, was, I imagine, given to talk and speculations about the political situation. Considerable numbers attended the meetings of Mr. Gandhi and his satellites. In the Hostel there was a disposition for different communities to squabble. On the whole however commonsense ruled the students and a natural unwillingness to sacrifice practical ends and solid achievements of study for windy and insubstantial ideals. That the majority, being youthful, sympathised with the *ends* which non-co-operation professed is probable, but Bombay students are too sophisticated to be easily blinded to their practical interests and too shrewd to be wholly led by sentiment."

Mr. Rawlinson (Karnatak College) reports :—

"The vast majority of the students are loyal and willing to work but they are coerced and bullied by outsiders who terrorize them until they promise to leave."

He emphasizes the necessity of erecting a hostel in which the students can be protected from molestation. Hostels are recognised as perhaps the most important means of promoting the corporate life of a college and of creating an atmosphere through which the students may assimilate the influence of the college. In other Government colleges also there is an urgent need for an extension of the hostel, as also for additional playing fields. The Principal of the New Poona College reports :—

"Unscrupulous efforts were made by non-co-operators to shake the college to its very foundation and to mislead students to paths that held forth merely illusory prospects. The situation was serious and critical and required tactful handling. The Managers to a man rose equal to the occasion. The names of 54 students were struck off the roll during the year. Of these 14 announced that they left owing to non-co-operation."

There was an agitation against the religious teaching given in the Wilson College, but the spirit of the general body of the students is reported by the Principal to have remained excellent. Mr. Covernton remarks :—

"There were 5 lady students in the Senior B. A. class, 2 reading Philosophy Honours, 1 English Honours, 1 Sanskrit Honours and 1 History Pass. In the Junior B. A. class four, 1 reading English Honours, 1 Sanskrit Honours, 1 History Honours, 1 Science Honours. There were 5 in the Inter Arts and 6 in the F. Y. class. The total number of lady students is 19 against 23 in 1919-20 and 21 in 1918-19. Year by year one notices that the women students display a greater freedom from undue shyness and a greater readiness to converse on equal terms with tutors or students and to take part in public or semi-public functions. Intellectually too a few of them prove themselves the equals of the men. But they have still much lee-way to make up. There is still a considerable proportion who show little real interest in things intellectual and little disposition to devote time and trouble to study outside prescribed courses and text-books. It is for instance very difficult to get them to keep alive a literary or debating society in any form. Probably, like the men students, their minds have been distracted this year by political and social controversy. Some have little time to spare for study after performing domestic duties."

Chief events

24. The University admitted Gujarati, Marathi, Kanarese, and Urdu under languages into the B. A. Curriculum. In consequence, Government have sanctioned for Government Arts Colleges 5 lectureships—2 each in Marathi and Gujarati and 1 in Kanarese—for a period of two years. Special scholarships of the value of Rs. 20 per mensem have been sanctioned for the Presidency proper—4 for the depressed classes and 20 for backward classes (including the Marathas) other than Mahomedans and depressed classes. The New College at Poona was permanently affiliated and the affiliation was later on extended by the addition of the Honours course in Mathematics to the B. A. course. The Sarvajanik College, Surat, was affiliated as a full-grade college for the B. A. course. The College is now named the "M. T. B. Arts College, Surat" after Mr. Maganlal Thakordas Balmukunddas who has offered it a donation of Rs. 2 lakhs.

25. There were two scholars—one at the Elphinstone and one at the Deccan College—from non-Brahmin Marathi-speaking classes. The Elphinstone College Scholar, A. S. Asyekar, is reported to have been only moderately diligent. The conduct of the full free student, G. S. Chavan, was not altogether satisfactory. The Principal, Deccan College, reports that the results of reserving scholarships are not as yet very striking but that in the given conditions they may be termed satisfactory. *Maratha Scholars*

CHAPTER V

SECONDARY SCHOOLS

26. The total number of Secondary schools declined by 65 to 475. The decrease was entirely in Middle schools, High schools having increased by 3. The decrease was due almost entirely to "Non-co-operation". There are 144 High and 247 Middle schools for boys and 43 and 41 respectively for girls. The number of pupils decreased by 6,121 to 76,252, of whom 10,821 were girls. Of the 391 Secondary schools for boys, 38, with 4,456 pupils, were European and Anglo-Indian schools, 43, with 9,601 pupils, English-teaching, and 394, with 62,195 pupils, Anglo-Vernacular. By management, 34, with 10,509 pupils, were Government schools, 61, with 6,309 pupils, Board schools, 312, with 49,241 pupils, aided, and 68, with 10,193 pupils, unaided. *Schools and pupils*

27. The total expenditure on all Secondary schools for boys and girls increased by Rs. 2,27,131 to Rs. 49,27,757, 34·5 per cent of which was met from Provincial, 2 from Municipal, 0·4 from Local Board Funds, 37·7 from fees, and 25·4 from other sources. The grants paid to aided schools (including European schools) amounted to Rs. 11,44,247 showing an increase of Rs. 1,69,067. The average cost of a Secondary school (whether for boys or for girls) and of a secondary pupil (boy or girl) were respectively Rs. 10,374·2 and Rs. 62·7. The average cost per pupil in a Government, aided, and unaided school, was Rs. 82·3, 67·3, and 32·2 respectively. The expenditure on secondary schools for boys increased by Rs. 1,00,154 to Rs. 38,10,140. The corresponding cost per pupil, increased by Rs. 3 to Rs. 57. The average annual fee per pupil in Government, aided, and unaided schools was Rs. 29·7, 25·0, 9·4 respectively. *Expenditure*

28. The fees charged in Government schools are :— *Fees*

Standards.	Mofussil.	Bombay.
	Rs. a. p.	Rs. a. p.
I to III	1 8 0	2 8 0
IV and V	2 8 0	3 8 0
VI and VII	4 0 0	4 8 0

Remissions of fees are allowed at the discretion of the Head Master up to 15 per cent of the sanctioned maximum of the school. In the award of these free studentships age and progress are to be considered. For this reason the award was in many cases not up to the sanctioned percentage, there not being sufficient suitable candidates. In the last 9 years the average cost of educating a pupil in a Government school has risen from Rs. 51-11-5 to Rs. 80-12-3, of which Rs. 19-0-2 and Rs. 50-12-1 respectively were borne by Government. These figures in themselves would appear to provide a strong argument for raising the fees in Government schools. In Ahmedabad and elsewhere the schools under private management are charging fees higher than those charged in the Government schools, and the Managers of the former are complaining that they are being undersold by Government. As observed by the Educational Inspector, C. D. (quoted below), it is hard to see how the schools are to find the necessary funds to pay their staffs adequate salaries.

29. Owing to the decrease in the number of secondary schools, the number of teachers has decreased by 257 to 4,245. Of these, 26·2 per cent are trained and 29·8 per cent possess a University degree. In Government schools, 49·8 per cent re trained and 72·3 per cent are graduates. The average of teachers per school *Teachers*

is 9, and of pupils per teacher, 18. The most pressing need of Secondary Education is that for more trained teachers. Government are considering the question of extending the Secondary Training College. The Bombay University has instituted a new degree of 'Bachelor of Teaching' the first examination for which is expected to be held in 1922 at the earliest. Under the new rules the candidates for this degree must be Graduates of the Bombay University or of a University recognised by the Bombay University and must after graduation have (1) kept the first and second terms in a Training College recognised by the University and have served for at least a period of one year on the staff of a High School recognised by the Joint Examination Board, or (2) served to the satisfaction of the Head Master for a period of at least three years on the staff of a High School making special provision for the training of its staff and recognised for that purpose by the Syndicate. The candidates will be required to pass the examination in two parts, written and the practical. In the written examination there will be two papers on the Science of Education, two on the History of Education, and three on the Practice of Education. After passing in Part I (the written examination) candidates will be tested as to their practical skill in class management and class teaching. The revision of salaries of Assistant Masters and Mistresses and Assistant Deputy Educational Inspectors in the subordinate Educational Service is still before Government. In Sind it has been found impossible to secure teachers on the salaries offered. In most aided schools, except those in possession of endowments, the pay of the teachers is quite inadequate. In this connection Mr. Hesketh observes :—

"It is a matter for regret that pay as low as Rs. 25 is still offered to Matriculates in some Anglo-Vernacular schools. I imagine that such teachers add to their income by private tuition, but this is very unsatisfactory and it would appear to be necessary to consider the question of increasing the fees generally in Secondary schools. Such a course would naturally be unpopular, but the teachers must be paid a living wage, and it is a question whether Government can reasonably be expected to meet the whole of the increased cost. The managers of schools certainly cannot do much."

As reported last year, service in a school is too often regarded as nothing but a stepping-stone to more lucrative employment, especially the Law. Until teachers are able to command salaries which will enable them to live compatibly with their station in life, with the assurance of a pension or bonus on retirement, this will always be the case. To encourage the employment of trained teachers in aided schools a scheme of grants graduated according to the proportion of trained to untrained teachers has been framed and is now before Government.

Hostels

30. The number of students residing in hostels increased by 1,617 to 5,816. There were 629 boarders in hostels attached to Government schools. These hostels as a rule were not full, as a result chiefly of the high cost of living. On this subject Mr. Hesketh makes the following remarks :—

"I doubt whether there can be much development of the hostel system unless a different policy is adopted. Government cannot go on building hostels for which an 'economic rent' including the cost of servants would be from Rs. 5 to Rs. 10 per mensem. The boys pay 8 annas and in many cases cannot afford to pay much more. We must be content with buildings of a more modest type and I am by no means certain that it is desirable to provide a much higher standard of living than the boys are accustomed to at home, unless there is a reasonable certainty that they will be able to maintain this standard in after life. In England the standard of living at a boarding school before the war was probably considerably lower than a boy was used to at home ; *e.g.* the food was plainer and the arrangements generally more rough and ready. The most promising hostels I have seen are 'community hostels', maintained by the Marathas, Leva Kunbis, and others..... Such hostels deserve every encouragement and the principle of giving grants-in-aid has been accepted by Government. I am afraid, however, if we demand European standards in the way of infirmaries, infectious wards, etc., few hostels will be able to claim any grant. The alternatives are one or two palatial hostels fully equipped with all that is necessary, or a considerable number of hostels of a more modest type, much below the ideal but much better than the so-called 'hostels' in the bazar which boys would otherwise have to live in."

Science Teaching

31. The Inspector reports that the Head Masters are keen and anxious to make the best possible arrangements, and a distinct advance in the improvement of laboratories is noticed. He presses for a public examination in Science for students, observing that—

"there is no doubt that the school test has not worked satisfactorily. The Examiner is the teacher himself and the head masters have been known to issue certificates very liberally. It must be noted besides that the students are examined in what has been done rather than in what ought to have been done..... The report of the Examiners in science also shows that even those who thought of appearing for science—a small fraction of those certified as having done good work—were badly prepared."

He also urges that science should be made compulsory in standard V, as the Joint Board Course for standards VI and VII is really a three years' course and presupposes a certain amount of work in standard V. The above views are echoed in the reports of the other Inspectors and there appears to be a general consensus of opinion that except in a few schools the subject will never receive the attention it deserves unless it is made an examination subject, while complaints are general that the course cannot be completed in two years. Classes were held for Government teachers and 36 were trained. These classes are of the type of extension lectures and afford an opportunity to teachers to work in a well equipped laboratory and of obtaining instruction in ordinary laboratory technique and the making of apparatus. The Inspector gives the following general review:—

"During the past year the work of the various high schools has not been of the same nature throughout. Government High Schools and some Aided and Unaided schools adapted themselves to the changes introduced by the Joint Examination Board but there were a number of schools which continued to work on old lines for various reasons, the chief being that some head masters did not quite realise the nature of the changes while others were not in a position to go through the extra work in subjects added for want of apparatus and material and competent teachers."

First Aid.

32. First Aid is regularly taught in the VIIth standard of all schools either by the class masters or by local medical men, who do the work without remuneration. Boys from the Elphinstone, Ratnagiri, Nasik, and Nadiad High Schools secured the St. John Ambulance First Aid Certificates.

Drawing.

33. 2,989 and 1,118 candidates appeared at the Elementary and Intermediate Drawing examinations respectively, of whom 1,286 and 581 respectively were successful, against 1,301 and 590 in the preceding year. The Inspector of Drawing reports that the drawing, though it shows some signs of improvement and of becoming more educational, is still too machine-like and taught in too mechanical a manner. "What are required are more intelligent teachers and more regular supervision."

Manual Training.

34. At Dharwar, Belgaum, and Bijapur both paper and wood sloyd are taught by teachers specially trained in the subject. Paper sloyd is taught at Sholapur and Dhulia and has lately been introduced in Nadiad.

Direct Moral Instruction.

35. Direct moral instruction is given in all Government schools for one period every week. I quote the following from the report of the Educational Inspector, Bombay Division:—

"The Principal of the Elphinstone High School thinks that any measure of success in imparting such instruction necessarily depends largely upon the personality of teachers in school and the influence at work at home. The Head Master, Thana High School, says 'unless these lessons are accompanied by a ring of sincerity and high moral sense on the part of the teachers, coupled with a moral atmosphere peculiar to Indian social and religious life pervading the home, there is a danger of their degenerating into cut and dried formulæ almost tiresome to our young listeners.'"

The Educational Inspector, N. D., remarks:—

"The list of moral topics to be dealt with during the year is settled at the beginning of each school year and masters are instructed to draw upon English as well as Indian works for stories. The personal example of the teacher, however, acts more powerfully than any amount of direct moral teaching. The Head Master, Sorabji J. J. High School, Surat, reports that he still adheres to his views that direct moral teaching is not of any great use and fails in its main objects in these days when disobedience to parents and all constituted authority is openly preached and largely adopted by the non-co-operating public under the influence of Gandhi school."

I entirely subscribe to the view that the personality of the teacher is the dominant factor, and I am extremely sceptical of the value of much of the direct moral teaching given in the schools. Not that words of advice coming from a teacher who has the respect and confidence of the pupils cannot be a very potent influence for good. But unless the teacher's character is one that carries respect no homily that he delivers is likely to have any good results.

Medical Inspection

36. In all Government schools and many aided schools a regular terminal record is maintained of the weight, height, eye-sight, and chest measurements of pupils, and serious defects are brought to the notice of parents. Six Medical Inspectors (one for Bombay City and one for each of the five Divisions) were appointed shortly after the close of the year.

Physical Training, Games and School Life

37. In Government schools class Drill as well as open-air Drill is performed. English and Indian games are played in all schools under supervision. In most schools some of the members of the staff take an active part in the boys' games, but generally speaking the number of those who do so is small. The Department takes proficiency in games into consideration in selecting men for teachers. The admirable organisation of the games at the Garud High School, Dhulia, which is conducted under the personal supervision of the Head Master, deserves special commendation. Mr. Grieve from Sind reports that he notices an increase in the number of boys playing open-air games and an increase in the number of masters who take part in them. Many schools, besides encouraging games, make provision for other interests and activities and do not merely confine themselves to providing class instruction for a given number of hours. The Boy-Scout movement has its followers, and the schools are anxiously awaiting the return of Mr. Miller and the six selected Scout Masters who have gone to England for special training. Most High Schools have their Debating Societies and their Co-operative Credit Societies, while such a school as the New High School in Bombay has its Dramatic Society and its School Orchestra, its Debating Club and its Natural History Museum. The Monitorial system is followed in most schools. In the Poona High School Mr. C. R. W. Griffith, whose sad death since the close of the year under report the Department has to deplore, had striven with most happy results to develop a corporate life and to create a public school atmosphere. There is, however, I fear, in most schools little or no corporate life and the influence of the school is generally negligible.

School Work and Methods

38. More than one Inspector refers to the lack of intellectual curiosity on the part of most teachers, of whom reading for the sake of self-improvement is said not to be characteristic. The following remarks from Mr. Hesketh's report will be found of interest :—

"All schools follow the course leading to the School Leaving Examination. In a few cases an attempt has been made to give it a more practical bearing by the introduction of carpentry, and other hand-work. This is much to be encouraged. In a few schools also, to judge by the essays of Standard VII, some attempt is made to broaden the outlook of the boys by wider reading.....Speaking generally, however, one does not find much originality of outlook in the Anglo-Vernacular Schools, and the work is still dominated by Matriculation. Unfortunately the School Leaving Examination is such that a boy with a retentive memory and smatterings of knowledge can usually contrive to pass. By securing a few marks for each question he scrapes together the necessary 25 or 33 per cent. He knows no part of his subject properly, but he goes on to repeat the same process in the Colleges. It is not always realised how much an examination influences the work of a school. It is not so much the prescribed curriculum, as the type of question paper and system of marking. As long as 25 per cent only is required to pass, an examiner must either let through the large majority of candidates or he must set papers with the object of finding out what a boy does not know, rather than what he does know, and the boys are prepared accordingly. I do not want to be misunderstood. I am not advocating the raising of the pass standard from 25 per cent to, say, 50 per cent with a view to reducing the number of passes, but to enable simple, straight-forward questions to be set which every boy who has studied the subject honestly should be able to answer. If this were done, I believe it would react on the teaching, and that we should have more efficient work done in the schools. There is little teaching of English by the pure translation method, at any rate, when the Inspector visits a school, but judging from results a good deal more translation is used in the lower classes than is necessary. A more serious fault is the overdoing of explanations and 'other words' in the higher classes, which results in slipshod and inaccurate writing. A great deal of time is still wasted in doing unnecessary rules and examples in Arithmetic. Many teachers delight in setting questions which deal with ideas quite outside their pupils' experience. Principles are neglected and a boy when given an example usually tries to think of similar examples he has done and works it out accordingly. Many sums which could be done quite simply by Algebra are worked out laboriously and clumsily by Arithmetic. I believe myself that if the syllabus were curtailed and common-sense were applied to the teaching, the total time now spent on Arithmetic in the High School course could be reduced by at least one-third. The lessons thus saved could be devoted to more advanced work in Mathematics or any subject for which a boy showed some aptitude. It is, I think, a pity that geography no longer forms an examination subject for Matriculation. It can be made a most valuable school subject."

39. At the School Leaving Examination held by the Joint Board 5,801 candidates appeared in subjects qualifying for Matriculation, of whom 2,692 were successful. The corresponding figures for Government Service were 1,394 and 334. The following remarks are taken from the University Report :— *Joint Board Examination*

"Out of 1,026 who appeared both for the Matriculation and Government Service Certificate Examination, only 252 succeeded in passing in both at the same time. The above figures show that those who apply for Government Service Certificate only are weaker in their studies than those whose aim is to take up University studies. Again, the percentage of passes among those who offered themselves for the Matriculation only is 45.6, while among those who offered themselves for the Matriculation and Government Service Certificate 51 per cent passed for Matriculation, while only 24.6 per cent obtained the Certificate for Government Service. The majority of those who passed the Matriculation Examination but failed in Government Service Certificate Examination failed in Elementary Science—a subject in which only a certificate is demanded by the Board for the purposes of Matriculation."

The Joint Board publishes in its report lengthy extracts from the reports of the examiners in various subjects. These are of great interest and must be of high value to the schools if proper use is made of them. Unfortunately, however, it is reported :—

"there are still complaints that some teachers will not study the previous reports on their school, with the result that the same faults are found year after year. Teachers should not only study the reports of their own school, but should also examine the general reports which are issued annually in order to see what have been found to be the usual failings common to all schools. These have constantly been enumerated in the reports ever since the examination was started."

The experience of the Department has been the same, and complaints of the same common mistakes were re-iterated year after year by the examiners in the old Departmental School Final Examination. I give two interesting quotations from the Joint Board reports :—

English Essay.— "A weakness for high sounding expressions (*e.g.*, 'Scout Commissioners are trying to open the treasury of success for our young men') was in evidence, and we have still with us the candidate who carefully prepares passages expatiating on the glories of ancient India, on the beauties of rural life, and on the advantages of British rule, and is determined to work them into his essay somehow or other. The essays, generally speaking, were dull, and some (especially the essay on 'boy scouting') were reproductions of essays dictated in class."

History.— "The general standard of knowledge shown in this subject was lamentably low. The paper was an easy one and a mere knowledge of facts would have sufficed for more than a mere pass. But even a knowledge of facts was absent. The most elementary facts were not known and the great majority of candidates were content to offer vague generalisations in place of the answers required."

There were 241 schools on the Books of the Board, 22 having been newly brought on the register and 27 removed. The latter figure includes 4 schools disaffiliated on account of nationalisation. The age limit for the examination has been abolished.

CHAPTER VI

PRIMARY SCHOOLS

40. The total number of primary schools for boys and girls has risen by 304 to 13,018, and that of pupils in them by 46,914 to 807,036, the latter increase being one of 6·2 per cent. The number of primary schools for boys, with which this chapter is specially concerned, rose by 261 to 11,513, and the number of pupils by 40,276 to 697,714, or 6·1 per cent. The increase in the number of pupils is shared by all classes of schools. Of the 261 new schools, 54 were Local Board Schools. Government were unable to give any grants during the year for the opening of new schools, as they had during each of the previous three years. By Divisions the increase is distributed as follows :—Southern Division 6,124, Central Division 18,098, Northern Division 1,185, Bombay Division 7,947, Sind 6,373, and Aden 549. The increase in the Central Division is the more remarkable when it is remembered that several districts were seriously affected by scarcity at the end of the year. The Northern Division would have shown a far larger increase but for Non-co-operation. The average number of pupils per school under Government, *Schools and Pupils*

Municipal, Local Board, and private management (aided and unaided) is 128·5, 146·1, 56·4, and 43·3, respectively. The growth in the number of boys attending primary schools for the last 12 years is shown in the graph attached to Chapter V. Of the schools, 69·8 per cent are Local Board, 7·7 per cent Municipal, 21·2 per cent aided, 1 per cent unaided, and 0·3 per cent Government schools. Of the pupils 64·9 per cent are in Local Board schools, 18·6 per cent in Municipal, 15·1 per cent in aided, 0·8 per cent in unaided, and 0·6 per cent in Government schools.

Stages of Instruction

41. 7·9 per cent of the pupils in primary schools for boys and girls were in the upper primary stage of instruction, *i.e.*, in standards 5 to 7, and 92·1 per cent were in the lower primary stage. The latter, if subdivided into (1) reading printed books and (2) not reading printed books, were 64·9 and 27·2 per cent respectively. Separate figures for boys only work out at about the same percentage.

Distribution of primary schools

On the average one boy's primary school served 10·7 square miles of area and 2·3 inhabited towns and villages. The male population under instruction in the primary stage increased by 4 to 63·5 per 1,000.

Expenditure

42. The total expenditure on primary education increased by Rs. 13,61,729 or (12 per cent) to Rs. 1,27,21,451. The expenditure on primary schools for boys rose from Rs. 97,38,985 to Rs. 1,06,58,790, or by 9·4 per cent. Of this amount 65·8 per cent was met from Provincial, 15·9 per cent from Municipal, and 6·3 per cent from Local Board funds. The contribution from Provincial funds increased by Rs. 9,21,624 or 15·1 per cent to Rs. 70,07,649. 15·5 per cent of this represented grants to Municipalities, 79·3 per cent to Local Boards, and 4·3 per cent to schools under private management. The percentage of grants to expenditure by the three agencies just named was 37·6, 86·8, and 25, respectively. During the last 10 years the average annual cost of educating a pupil in a primary school has increased from Rs. 8-6-2 to Rs. 16-8-4, *i.e.*, by nearly cent per cent, while the cost to Government has increased from Rs. 3-14-9 to Rs. 10-1-8, *i.e.*, by 157·7 per cent. The percentage of cost to Government to the total cost has risen from 46·7 to 61·2. It may be noted that there has been a rapid increase in the cost of education during the last four years, during which the cost per pupil has increased by Rs. 6-3-3 (of which Government has contributed nearly 3/4) as against Re. 1 in the preceding four years. Mr. Hesketh remarks:—

"There has been a good deal of trouble in dealing with some of the Municipalities over questions of finance. The grant of war allowance, the institution of a time-scale of pay, and lastly the raising of the pay of untrained teachers have laid a heavy burden on the Municipalities, who have had to meet half the additional expenditure from their own resources..... A frequent bone of contention has been the award of Selection Grades to masters in Municipal service, some of them in charge of the largest schools in the district. Another common complaint is that the pay of teachers is raised without sufficient notice and Municipalities have to find money suddenly which has not been provided in the Budget. This has been met to some extent by giving advances. Municipalities also complain, or some of them do, that they have to meet half of all increased expenditure, while in the case of District Local Boards Government shoulders the whole amount of any additional expenditure. The question of the distribution of expenditure on primary education between provincial and local revenues is a very difficult one, but it is essential that it should be tackled. A large village is given a new school house at a cost of Rs. 30,000 or more, and the villagers have nothing extra to pay. A small Municipal town, a few miles away, has a thoroughly bad school building but cannot have a new one without raising part of the cost by taxation. These apparent anomalies are not easy to explain. The smaller Municipalities cannot afford to employ highly paid officials and this often adds to the difficulties of the Department, as rules, etc., are not understood, and endless correspondence results. Even when Municipalities are willing to increase taxation, the machinery moves slowly. It is a question also whether the taxation in some of the Municipalities differentiates sufficiently between the rich and the poor."

The question of raising additional funds to provide for the extension of primary education with a view to making it compulsory is now under consideration by a Committee (appointed by Government) of members of the Legislative Council. As the rules stand at present, Local Boards have no power to raise any additional taxation for Primary Education, their allotment from their own resources being confined to the one anna cess, of which at least one-third is required to be devoted to Primary Education. No Board spends more than this obligatory one-third on Primary Education, though a few make grants to collegiate, secondary, and

special education from their General funds. While Government contributes 85·1 per cent of the cost of Local Board schools and gives grants to Municipalities equal to one-half of their expenditure, the grants to schools under private management are limited to one-third of their expenditure. There are evidences of a widespread feeling that private enterprise should be encouraged by the award of more liberal grants. The average annual expenditure on a school for boys increased by Rs. 61 to Rs. 926, and that on educating each pupil by Re. 0·8 to Rs. 16 (Rs. 23·1 in a Municipal, 14·7 in a Local Board, 12·3 in an aided school).

43. The fee collections amounted to Rs. 4,51,992 and formed 4·2 per cent of the expenditure. The present rule is that no child shall be kept away from school by inability to pay fees. The rules regarding fee concessions have always been such as should have secured this result, and if in the past any child in a Local Board or Municipal school was kept out of school owing to the cause indicated, it was because the Board did not give adequate concessions. Municipalities may, with the consent of Government, make primary education absolutely free, and 11 of the 156 Municipalities have done so. In Local Board schools 43·3 per cent of the children are admitted free. The sons of cess-payers are admitted at reduced rates. The average annual fee per pupil in a primary school has fallen in the last five years from annas 11-11 to annas 10-10. This figure includes schools under private management, which generally charge fees, the average fee in an unaided school being Rs. 2-14-8. The figure for Local Board schools was annas 6-2, and for Municipal schools annas 14-9. In all Government and Local Board schools all girls are admitted free. *Fees*

44. Of the total number of Local Board schools for boys and girls, 29·2 per cent meet in their own buildings; 18·3 per cent are held in exclusively rented buildings; and 48·5 per cent are housed free of rent in chavdis, temples, dharmsalas, and private houses. Thirty-seven new buildings were erected (and 42 were under construction), while 25 buildings were extended. The Divisional Inspectors are unanimous in thinking that the present procedure of selection and acquisition of sites, the preparation of plans and estimates, their passing by all the various authorities concerned, the provision of funds and the sanction of detailed grants is an unnecessarily lengthy and complex one. In this connection the Educational Inspector, Northern Division, observes:— *School buildings.*

"It is high time that the procedure is simplified and the agency through which the work has to be carried out is improved and strengthened."

As Mr. Hesketh observes:—

"The building grant rules of the Grant-in-Aid Code will have to be radically amended or abolished, and a much more rough and ready system of grants devised."

There is a unanimous expression of opinion on the part of the Educational Inspectors in favour of less costly and less elaborate school buildings. Thus Mr. Kadri (N. D.) remarks:—

"It is most desirable that people should be encouraged and assisted to put up simple but sanitary buildings for their own schools, as is done in the Surat District where several popular buildings for primary schools have come into being through benevolent efforts and sympathetic co-operation of the people." Mr. Hesketh writes: "In the Satara District, the villagers of Saspade have at a cost of Rs. 2,000 built without Government aid a decent school house for 100 pupils, a house of burnt bricks with a roof of corrugated iron sheets. This was possible owing to the interest taken by the Inamdar of the village, who has the confidence of the villagers. The Inamdar of Kalami, Taluka Tasgaon, a sensible and influential *Mahar*, was able to persuade the villagers to build at their own cost a suitable school house, an example followed by the low castes of Bhilavadi (in the same Taluka) who have placed the material collected and the site at the disposal of the District Local Board for completing the work they had commenced. As I pointed out last year it is impossible to erect any large number of school buildings according to the approved Public Works Department plans. The cost now works out at Rs. 75—Rs. 100 per pupil and shows no signs of falling. Buildings of this type are admirable and several I have seen would be a credit to any country, except perhaps from an architectural point of view. The trouble is that when one school is built at a cost of a quarter of a lakh there is not much money left for the rest of the schools in a Taluka. If District Local Board schools are prepared to aid local enterprise we may be able to get cheap buildings, sufficiently well lighted and ventilated, which will serve their purpose, for a number of years if not for several centuries."

The District Local Board, Dharwar, prepared type designs for cheap school buildings for 30 and 60 boys at an estimated cost of Rs. 1,700 and Rs. 2,500. The plans have been sanctioned by the Department after approval by the Superintending and Sanitary Engineers. The cost per head works out at Rs. 56 and 41 respectively.

45. The total number of teachers in primary schools, male and female, has increased by 1,010 to 28,650. Of these, 43·6 per cent are trained. The percentage of trained teachers was 75·2 in Government, 50·3 in Municipal, 40·4 in Local Board, 17·6 in aided, and 12 in unaided schools. Mr. Kadri remarks that :—

"The decent start now given to Vernacular Final passed men has added to the popularity and enhanced the value of the Vernacular Final Examination which attracted a large number of candidates at every centre at the last examination."

Details regarding this Examination, which is the necessary qualification for a teacher, are given below in this chapter. The average number of pupils to a teacher in District Local Board schools was 26 and 24 in Municipal schools. Of the District Local Board schools, 4,447 are one-manned. The majority of these schools teach the infant class and 4 standards, and some even beyond the IVth standard. The loss of efficiency caused by this state of affairs can be easily imagined. It is the stagnation in the infant classes that is responsible more than anything else for the wastage that occurs in the schools. As shown above, no less than 27·2 per cent of the children at school are "not reading printed books" ; the percentage for village schools would be considerably higher than this. The paramount need for additional assistants is thus clear. Mr. Hesketh is of opinion that in dealing with illiteracy more can be done by providing additional assistants than by continuing to open new schools. I entirely endorse this view.

46. Grants now amounting in all to Rs. 19,12,753 are paid to Local Boards to enable them to meet the recurring charges for "Code pay" to trained primary teachers in accordance with the revised scales and for war allowance. The salaries paid, however, were generally regarded as inadequate ; the following remarks of Mr. Hesketh are applicable to the whole Presidency :—

"There was continuous agitation in the early part of the official year for better pay for the teachers. Taluka, District, and Divisional Conferences were held and resolutions passed, setting forth the demands of the Primary teachers. There is no doubt that the untrained teachers were not getting a living wage and that the improvements which had been made in the pay and allowances of the trained men were being swallowed up by the increased cost of living. The agitation increased as time went on. Ultimately a Committee of the Legislative Council were appointed which recommended that allowances be given to untrained teachers and junior 1 year men bringing up their total pay plus allowances to Rs. 20, 23, 25, according to qualifications and appointment held."

These minima were granted with effect from 1st September, 1920. Since the close of the year Government have sanctioned the following minima for trained teachers :—

	Rs.
First Year trained teachers	30
Second Year trained teachers	35
Third Year trained teachers	40

Effect has been given to these rates from 1st April, 1921. The incremental scale of pay of trained teachers is still under the consideration of Government. In view of the increasing cost of education and of the need for its expansion it will be necessary to limit the number of third year trained teachers to the minimum requirements.

47. The School Committees, as at present constituted, are, it is reported, of little use. This has been the constant report in the past, and does not augur well for the success of the new panchayats, if, as has been suggested, they are endowed with various powers. It may, however, be hoped that new responsibilities will bring with them an increased sense of duty.

48. At the Vernacular Final Examination held in 1921, 8,498 appeared in the whole of the Presidency including Sind, of whom 4,167 or 49 per cent were successful. The figures for last year were 7,415, 3,648, and 49 respectively. The percentage of passes in the different divisions was, Bombay Division 45·9, Central Division 47·2, Northern Division 52·7, Southern Division 37·3, and Sind 71·9. Among the successful candidates were 687 Mahomedans, 56 of the Depressed classes, 80 Aboriginals, and 59 Jains. *Examinations*

49. The number of night schools has risen by 14 to 187. The number of pupils attending them has increased by 555 to 5,696. Besides these, 34 schools with 537 students are maintained from the funds of Sir V. D. Thakersey at the disposal of the Central Co-operative Institute, Bombay. There are also 5 night schools in which secondary education is imparted. The number of pupils attending them is 185. *Night Schools*

50. The total number of factory children in the Presidency is reported to be 6,569, of whom 3,964 are under instruction. They attend schools specially established for them in Bombay, Sholapur, Ahmedabad, Broach, and Gadag. In Bombay the number of children working in factories decreased from 3,116 to 3,037 but the number of children attending schools increased from 595 to 844. The Bombay Municipality has six schools with 454 pupils. The Government Factory School at Sholapur has 499 pupils. The Morarji Gokuldas Mill School, Sholapur, has 492 pupils. Of 2,345 factory children in Sholapur, 1,419 were attending a school. 280 boys working in the Government factories at Kirkee attend the aided night schools maintained by Messrs. Alegoankar. The Municipal school at Ahmedabad is attended by 94 pupils and the three schools at Broach by 279 pupils. *Factory children*

51. Classes were held in the Training Colleges in the Central Division, Southern Division, and Sind for a fortnight for the benefit of the inspecting staff. The teachers of Nature Study at each College explained the new courses and demonstrated the methods followed. Similar classes were held in the Central Division and Southern Division for the benefit of selected Primary School teachers. In spite of the difficulties which exist in most places in the way of keeping school gardens, many schools are reported to have creditable gardens. New syllabuses in Nature Study have been introduced in the Training Institutions and in some of the bigger Primary Schools in the Presidency. An adaptation of a hand-book on Nature Study by Mr. Thompstone has been compiled and will be translated into the vernaculars of the Presidency. Instructions for the use of teachers of Nature Study have been framed by Mr. K. S. Vakil, Inspector of Training Schools. The need is for capable and enthusiastic instructors in the Training institutions who will prevent the subject becoming one of notes and text-books. In this connection Mr. Vakil reports :— *Nature Study and Gardening*

"Notwithstanding these difficulties, work in Nature Study and School Gardening has not been neglected. Use is fully made of every little strip of open land available for the purpose. Plants are also reared in pots for observational purposes. Study of insects, birds, and animals is pursued with zest with improvised materials. .... An aquarium has now been improvised in almost all training schools, a vivarium is maintained at Bijapur and Naushahro, and an aviary at Bijapur, Naushahro, and Karachi."

52. The Municipalities at Byadgi, Bandra, Dakore, Satara, and Surat have introduced compulsory education, compulsion being applicable to both boys and girls at Surat and Bandra. The Hyderabad (Sind) Municipality have applied for sanction to make education compulsory. The Karachi Municipality have approved of the principle and formulated a scheme to carry it out. They have however been unable to find funds, and have rejected a proposal for the imposition of an educational tax. The following figures show the increase in numbers since the introduction of compulsory education :— *Compulsory Education.*

Name of the Municipality.	Year of introduction of compulsory education.	Nos. previous to introduction.			Numbers on 31st March, 1921.		
		Boys.	Girls.	Total.	Boys.	Girls.	Total.
1. Surat ..	1919	6,041	2,343	8,384	8,640	4,425	13,065
2. Dakore ..	1920	450	198	648	662	201	863
3. Byadgi ..	1920	397	122	519	619	121	740
4. Bandra ..	1920	907	361	1,268	1,887	425	2,312
5. Satara ..	1921	1,650	617	2,267	2,072	486	2,558

Teaching of English

53. There are twenty English classes attached to primary schools in rural area including 2 Urdu schools. They contained in all 776 pupils. The classes are reported to be generally successful. There is a great demand for such classes, which were first introduced as an experiment in 1919. The question of extending their number is under the consideration of Government.

Wastage and the agricultural classes

54. I have made some remarks under the head of "Teachers" above on the subject of "Wastage", a term which refers to the extent to which our primary schools fail as an effective means of spreading literacy among the people. It has been shown that only 7·9 per cent of the children are in the upper primary stage, while no less than 27·2 per cent are not reading printed books, and it must be admitted that a very large percentage of the children who join a school never reach the IVth standard and thus cannot be said to become literate. It is feared also that a considerable proportion of those who learn to read drop back into illiteracy. Government have been giving the problem careful attention. With a view to providing facilities for reading after a boy has left school they propose to encourage by means of special grants the production of suitable reading material in the vernaculars, and to promote and assist the opening of village libraries. Government have also had under consideration the question of bringing primary education in rural areas into closer relationship with rural needs and measures are now being concerted between the Agricultural and Educational Departments to promote this purpose. As the orders of Government were not issued till after the close of the year, I do not refer to them in detail here. With regard to the education of the children of agriculturists, Mr. Grieve writes :—

"To popularise education among them and to meet their labour difficulties, as far as was reasonably possible, 2 vacations ranging from 3 to 4 weeks have been sanctioned for schools outside Taluka head-quarters and Municipal and Notified areas. They are to be given by the District Local Boards at the time of "Rabi" and "Kharif" harvests as local conditions demand. To further popularise primary education in the country districts and minimise wastage scholarships have been inaugurated."

The Educational Inspector, Northern Division, advocates shorter hours and a shortened curriculum in village schools. The experiment of half-time schools has been repeatedly tried during the last 30 years or more in various parts of the Presidency and, though the idea is a sound one, it has seldom worked well in practice, it being found that the parents either send their children to school or to the fields, and will not adopt the half-time system. It is, however, more likely that the system would be successful under compulsory education. The Educational Inspector, Bombay Division, observes :—

"The country is passing through an agricultural industrial revolution. Even if a school is opened in every village the question of unsatisfactory attendance cannot be overlooked. The tendency of the agriculturists and labouring classes being to go to towns and cities for earning the high wages that are offered there, the persons that are left behind in villages find it difficult to carry on agricultural operations, and all hands, young and old, are pressed into service. The result is that the attendance in village schools during half the year is most unsatisfactory. The problem is economic and it cannot be solved by the offer of small scholarships or free-studentships. It is impossible to foresee what the effect of the migration of the villagers to towns and cities would be on village schools ten years hence."

The conditions reported refer to the districts in the vicinity of Bombay.

Mr. Hesketh remarks :—

"There has been a good deal of general discussion on the question of the development of education among the agricultural classes and various suggestions have been put forward. The greater employment of teachers belonging to the agricultural classes, modification of the curriculum, and rearrangement of holidays have all been advocated. The first raises a difficult controversial question. A good deal might be done as regards the second. I am inclined to think however that what is needed is the fitting of the ordinary school curriculum to the environment of the pupils more than the introduction of a number of so-called practical subjects. What I mean is that the teaching of the 3 R's should be based as far as possible on a boy's experience of life. At present the boy in Bombay City and the boy who has never been outside his native village read the same books, work the same examples in Arithmetic and so on. It is an axiom of teaching that we should proceed from the known to the unknown. In the village school, I fear, we frequently proceed from the unknown to the unknown and a boy's memory is the only faculty which is cultivated. ..... The question of school holidays is not without importance and I have suggested that the fixing of the vacation should be one of the duties of the village Panchayats when they are formed."

55. The number of school-children's co-operative societies has risen by 27 to 418. These societies teach elementary business principles in a practical way and are reported to be doing well in most places. In Sind most of them exist in out-of-the-way places and are thus a real help and convenience. Some of the societies in the Bombay Division are reported to be existing in name only owing to the abnormal rise in prices of stationery, etc., and to be unable to compete successfully with the local shops. *Co-operative Societies*

CHAPTER VII

Professional Colleges and Schools

56. The Government Law School had 673 students, 408 in the first and 265 in the second LL.B. classes—a decrease of 139 and 53, respectively, due partly, the Principal reports, to the political situation, and partly to the unwillingness of the students to attend the morning classes, which are necessitated by the inadequacy of the accommodation but are generally found inconvenient. Greater use was made of the library than ever before. The Principal attended the library once a week, when on the average 10 to 15 students consulted him regarding their work and other matters. Owing to the Non-co-operation movement, 28 students left the college and many did not join the first LL.B. class for the second term. Considering, however, the exciting times the students went through in the second term, the Principal remarks that their spirit, behaviour, and sense of discipline in the class-room remained the same as ever before. At the first LL.B. examination 273 passed out of 738 and at the second, 271 out of 499. *Law*

57. At the College of Engineering the number of students declined by 7 to 298 (189 in University classes, 17 probationers, and 92 apprentices). The expenditure decreased by Rs. 4,942 to Rs. 1,36,835, of which 81·5 per cent was met by Government. Extensive alterations and improvements have been carried out in the main buildings. So far as was known, all passed students obtained employment. The demand appeared to exceed the supply very considerably. Of the 74 candidates for B.E., 58 appeared for Civil and 16 for Mechanical Engineering, of whom 46 and 8 were successful. At the 2nd grade Divisional Accountants' examination, out of 41 candidates, 6 passed against 52 and 11 the year before. The 33 candidates who took the Subovereers' (14) and the Electrical (8) and Mechanical (11) Apprentices' examination were all successful. The one candidate who sat for the Normal class examination was plucked. One scholarship is reserved for students belonging to Non-Brahmin Marathi-speaking Hindu Backward classes studying at this college. The scholar is reported to be doing well. The Engineering Class of the D. J. College, Sind, had 13 students. Visits were paid by the students to various Engineering works. Its expenditure was Rs. 7,602, of which Rs. 2,900 was contributed by Government. *Engineering*

58. The Sydenham College of Commerce and Economics had 236 students— 148 taking the degree course, 53 studying for the Accountancy diploma and 35 stenography. For admission into the junior degree class, 576 students applied and 250 presented themselves, but owing to want of adequate staff and accommodation only 100 were admitted. Of this number, 49 belonged to Bombay and 51 to other Indian Universities. The College is reported to have been not much affected by the Non-co-operation movement. The expenditure decreased by Rs. 472 to Rs. 78,832, of which 65 per cent was borne from Provincial funds. At the B. Com. examination 23 out of 59 passed against 24 out of 57 in the preceding year. Forty-six Government clerks were trained in shorthand, of whom 36 passed the test. Public lectures on Banking Law and Foreign Exchanges attracted large audiences in spite of the levy of admission fees. The death of Mr. Anstey, the first Principal, has been a serious blow to the College, the present position of which is largely due to his efforts. The increasing demand for graduates in Commerce by the leading business houses in Bombay is sufficient evidence of the usefulness of the institution. *Commerce*

Accountancy

59. At the Accountancy Diploma examination held in April, 1921, at four centres—Bombay, Madras, Calcutta, and Allahabad, 67 candidates appeared, of whom 14 passed. Five candidates out of 12 from the Sydenham College were successful. Only 2 candidates were awarded the Government Diploma in Accountancy. A Diploma in Co-operative Accountancy has been instituted.

Teaching

60. The Secondary Training College had 35 students at the beginning of the year, of whom 28, including 4 women, continued to the end. The expenditure increased by Rs. 2,656 to Rs. 43,185, which was almost wholly defrayed by Government. The Principal reports that the students did more handwork in preparing illustrative material, and had more systematic practice in drawing than before. All the 28 students (as well as 2 ex-students) passed the Diploma examination. The practical examination was conducted by a Board consisting of the college staff and three Inspectors. The question of extending the institution is engaging the serious attention of Government.

Science

61. The Royal Institute of Science, Bombay, started work in June, 1920, but has not yet been affiliated to the University as an independent Institution, its students being enrolled on the register of the Elphinstone College. The expenditure was Rs. 1,13,077.

Colleges under other Departments

62. Among colleges under other Departments, the Grant Medical College Bombay, had 1,155 students, the Agricultural College, Kirkee (Poona), 187, and the Bombay Forest College, Dharwar, established in July, 1920, for the training of the rangers, which meets in a block of the Training College for men, 9.

CHAPTER VIII

Technical and Industrial Education

Technical and Industrial

63. Technical and Industrial schools rose by 3 to 33—5 Government, 8 Local Board, 15 Aided, and 4 Unaided—, and the students in them increased by 150 to 1,907. The expenditure increased by Rs. 70,394 to Rs. 4,77,450, of which 69·2 per cent was borne by public funds.

Commercial Schools and Classes

64. The Sydenham College of Commerce and Economics is dealt with under chapter VII. Commercial schools and classes sustained a further fall by 8 to 31—1 Government, 7 aided, and 23 unaided. Students also decreased by 347 to 2,469. The expenditure decreased by Rs. 15,308 to Rs. 93,432, of which 8·8 per cent was met from public funds. At the London Senior and Junior Examinations held in May, 1920, 722 and 77 appeared respectively in various subjects against 663 and 132 of the year before, of whom 222 and 12 were successful against 258 and 14. These results cannot be regarded as satisfactory. The following were the results in the subjects chiefly taken for the Senior Examination—Book-keeping and Accountancy 104/316, Methods and Machinery of Business 65/122, Commercial and Industrial Law 23/99, Banking and Currency 15/65, Short-hand 0/10. It is noteworthy that not a single candidate has appeared in Commercial History and Geography for the last four years.

Direction

65. The Committee of Direction for Technical Education had 20 schools under its control. The expenditure on salaries of the aided schools was Rs. 45,424, and the Government grant Rs. 26,700. The expenditure incurred by the Committee on account of Establishment, Inspection, and Examination charges amounted to Rs. 14,300. Of 384 students examined 282 were successful, 59 having passed the final examination. The majority of the schools train boys in carpentry applied to house-building, furniture-making, carriage-building, or boat-making, or in weaving on handlooms, etc. The products of the schools, it is reported, as a rule find no difficulty in getting employment. About 50 per cent of the pupils belong to the artisan classes.

Technical Institute, Bombay

66. The Victoria Jubilee Technical Institute had 321 students against 338 in the previous year. At the entrance examination 210 candidates appeared from all parts of India, of whom 111 were admitted. A very large number who passed the test for Electrical Engineering had to be refused admission for want of accom-

modation. The expenditure was Rs. 1,76,100 and the Government grant Rs. 1·25 lakhs. Mr. T. S. Dawson, who had been Principal since 1908, retired during the year and was succeeded by Mr. A. J. Turner, B.Sc. (Lond.) F.I.G. At the Diploma examinations 15 certificates were awarded in Mechanical Engineering, 24 in Electrical Engineering, 7 in Sanitary Engineering and Plumbing, 6 in Textile Manufacture, and 5 in Technical Chemistry. At the examinations of the City and Guilds of London Institute, 92 candidates appeared, of whom 47 passed. These included 40 and 26 respectively from the Bombay Institute. It is reported that the men turned out of the Institute found no difficulty in getting suitable posts and that the demand was often greater than the supply. The new buildings at Matunga will be ready for occupation in 1922.

Technical Institute, Ahmedabad

67. The R. C. Technical Institute, Ahmedabad, had 55 students. Though the course of instruction is one of three years, 28 boys left the Institute during the year and there were 30 new admissions. The time of the annual examinations has been shifted from February to April. Sheth Mangaldas G. Parekh has offered to build at his own expense a hostel for 20 students and to present it to the Institute. At present a hostel is maintained in a hired building with monthly subscriptions amounting to Rs. 75 secured by the Principal.

School of Art

68. The Sir J. J. School of Art, Bombay, had 333 students including 13 girls, against 325 in the previous year. The Reay Art Workshops had 132 students learning various crafts. The Pottery section had 9 students. Much useful practical work appears to have been done, chiefly consisting in the testing of samples of clay. Exhaustive tests were made for the manufacture of terra cotta bricks and flooring tiles, with, it is said, very good results. The expenditure was Rs. 1,44,882, of which 93·7 per cent was borne by Provincial Funds. The School of Art proper had 192, of whom 18 learnt Drawing, 63 Painting, 24 Modelling, 8 Special Shading; 26 attended the Drawing Teachers' and 53 the Architectural classes. The number of candidates who appeared and passed respectively were 12 and 9 in Advanced Painting, 3 and 3 in Advanced Modelling, 23 and 12 in Advanced Architecture, and 29 and 18 in the Drawing Teachers' Examination. I quote from the Report of the Principal (Mr. W. E. Gladstone Solomon):—

"The Painting Classes have undoubtedly much improved during the year under report. That the advanced students are able to produce work of a higher standard is largely owing to the introduction of life classes for the study of the undraped figures as in the Art Schools of Europe. The study of form, which has been very closely encouraged not only in the life classes but in the elementary classes, has produced marked results of the most beneficial kind. The life classes have turned out some excellent drawings, and have already borne fruit in the Mural Decorations which have been successfully executed on the walls of the School of Art. During the year under report, after successful experiments with the cartoons, eight panels, four of them measuring $7'\text{-}2'' \times 4\frac{1}{2}'$ and four measuring $6'\text{-}9'' \times 4'\text{-}6''$, were completed; and the large panel, measuring $16' \times 30'\text{-}8''$, in the central class-room, and bearing the title of 'The Recrowning of India,' which was executed during the same period, was one of the most striking efforts in Indian Art ever produced by the students of the Sir J. J. School of Art. The Mural Decorations have caused a lively interest in the Bombay Presidency and throughout India, as is seen from the fact that between twelve and fifteen thousand people visited the exhibition of the Mural Paintings; and that demands for copies and photographs of these paintings continue to come in from all directions. During the current year Government contributed a special grant of Rs. 5,000 towards the Mural Decorations. His Excellency has also been pleased to commission the School to execute a series of Mural Paintings in the Darbar Hall, Government House, Bombay, and has expressed himself as very pleased with the designs recently submitted to him for this work. It is again pleasing to note that the Madras Fine Art Society requested the School of Art to forward at the cost of that Society some of the cartoons of the wall paintings for the Exhibition in Madras held in February last and that one of these cartoons was awarded a special silver medal. This output of decorative work and its reception by the authorities and by the Indian public indicates, I think, very clearly that the School of Art and its students have bright prospects before them."

It will, I think, be universally conceded that there are, at least, great possibilities in the new work which Mr. Solomon has called forth, and it may perhaps not be premature to claim that a national school of decorative painting has arisen. As regards modelling work Mr. Solomon reports:—

"The work has notably improved in the direction of line and silhouette, though the general percentage of attendance in all the classes is very low. The appointments of two visiting Professors, Messrs. G. K. Mhatre and B. V. Talim, has effected salutary improvement in the

organization of the Modelling Class. The students have commenced to turn out more thorough and artistic work, as is exemplified by some of the studies done by the candidates during the last Advanced and Intermediate Modelling Examinations."

As regards Architecture he reports :—

"The Government Diploma in Architecture has been established since 1916, but no student has yet been able to obtain it as the 5th Year Class which is to provide the necessary training does not yet exist. Students who pass through the present course are in much demand as assistants, but it is to become practising architects themselves that is naturally their ambition, and, this not being ordinarily possible for them, students of good general education are discouraged from taking up the profession of architecture."

Grade Art Examinations

69. There were 2,989 candidates for the Elementary and 1,118 for the Intermediate Grade Drawing Examinations, of whom 1,286 and 581 passed respectively, most of them coming from secondary schools. On the subject of Design the Inspector of Drawing and Craftwork remarks :—

"As patterns, many of the designs were exceedingly good and one of the Examiners was greatly impressed by the remarkable facility for conventional design displayed generally in the work he examined."

I can myself testify to the very high level of the design work done in the secondary schools, much of which would be highly prized for house decoration and by manufacturers of textiles, pottery, etc., in other countries. It is lamentable that when such highly artistic designs are ready to hand, those responsible for house decoration and for the manufacture of articles involving decoration in this country should prefer to follow inferior Western designs. It is perhaps the chief merit of the work of the present Principal of the School of Art that he recognises that the *forte* of the Indian artist lies in decorative work.

School of Drawing and Design

70. The School of Drawing and Design, Ahmedabad, had 29 students against 44 in the previous year. Of the 29, 23 were *bona fide* craftsmen. The subjects taught were carpentry, wood-carving, textiles, and metal work.

Music

71. There were in all 16 Music schools and classes with an attendance of 2,691 pupils. Fourteen of them were aided, the grants paid amounting to Rs. 3,187.

Future Development

72. Mr. F. W. Marrs, I.E.S., who was deputed to study recent developments in Technical and Industrial Education in Europe, has submitted a report on certain schemes of Industrial Education and Training in the United Kingdom and other countries of Europe and their application to this Presidency. A Committee has been appointed with Sir M. Visvesvaraya, K.C.I.E., as Chairman to draw up a comprehensive scheme for Technical and Industrial Education in this Presidency. It includes a strong non-official element, and important employers of labour, both European and Indian, are represented.

CHAPTER IX

Training of Teachers

Institutions

73. Excluding the Government Secondary Training College, Bombay, (which is dealt with in Chapter VII) training institutions have increased by 7 to 50—3 secondary (all for mistresses) and 47 primary. All the secondary institutions are aided. Of the primary institutions, 31 are Government, 2 Board, and 14 aided. Of these, 29 are for men and 18 for women. The number of students under training has increased by 581 to 3,593 (2,644 men and 949 wmoen) ; 2,612 are Hindus, 576 Mahomedans, 310 Indian Christians, 52 Parsis, 23 Europeans and Anglo-Indians, and 20 others.

Students

Government Institutions

74. In addition to a three years' Training College for Men (two for Marathi) and one for Women for each of the four vernaculars, Government maintain 21 District Training classes teaching the 1st year course only, including 7 classes newly opened during the year under report. Two of the classes are for instruction through Urdu. There are also Urdu Training Colleges at Poona (2 years), Ahmedabad (3 years), and Hubli (one year)—the last mentioned opened in December, 1920. Of the 2,580 male students under training in Government institutions, 1,537 were in the 1st year class, 642 in the 2nd year, and 401 in the 3rd year. The number in

GRAPH showing the growth of expenditure on Education from Provincial and Imperial Funds.

the 3rd year class in 1920 was 325; in 1919, 161; in 1918, 142; and in 1917, 124. The stipends of all male students were raised from Rs. 12 to Rs. 15 per mensem with effect from 1st April, 1920. A few non-stipendiary students were admitted to the District Training Schools.

Aided Institutions

75. There are 17 institutions, two for men and the rest for women. The two former represent Primary Training institutions maintained by Missionary bodies at Ahmednagar and Ahmedabad, respectively. The former has a two years' course of instruction; the latter a course of 3 years, but of a lower standard than that taught in the Government Training Colleges. The total expenditure amounted to Rs. 13,371, of which Rs. 5,148 or 38·6 per cent was borne by Government. The cost of educating a pupil amounted to Rs. 173·6, of which Rs. 66·8 was paid by Government. Of the 15 institutions for women, 3 with 35 pupils train Europeans and Anglo-Indians for Secondary schools, and the remainder, with 455 pupils, are Vernacular institutions conducted by Mission and other bodies and train teachers for Primary schools. The total expenditure on institutions for Europeans and Anglo-Indians amounted to Rs. 25,281, of which Rs. 12,145 or 48 per cent was borne by Government. The cost per pupil amounted to Rs. 722·3, of which Rs. 347 was paid by Government. The total expenditure on vernacular institutions, 7 of which teach the full 3 years' course, amounted to Rs. 69,141, of which Rs. 26,833 or 38 per cent was borne by Government. The cost per pupil amounted to Rs. 151·9 of which Rs. 58·9 was paid by Government. An interesting experiment, it is reported, is being made by the American Mission class at Sholapur with a view to devising a more practical course of study in the lower classes for the children of the less advanced communities. More detailed information regarding training institutions for women is given in Chapter XI.

Institutions for Women

Output of Teachers

76. The out-put of men and women teachers from Government training institutions in the year under report was 460 and 47 in the Northern Division, 526 and 63 in the Central Division (which provides also for the needs of the Bombay Division), 312 and 19 in the Southern Division, 11 and 0 in the Bombay Division, and 172 and 13 in Sind. As elsewhere reported, the question of reducing the out-put of 3rd year men is under consideration. It is only the largest schools, which teach the full Primary course (seven standards and an Infant class), that require 3rd year trained men, and their cost is now so great that the Boards find it impossible to employ more than the indispensable minimum.

Expenditure

77. The expenditure on training institutions increased by Rs. 2,31,647 to Rs. 8,79,351. Of this, 80·5 per cent was defrayed from Provincial, 3·4 per cent from Municipal, and 8·1 per cent from Local Board Funds. The expenditure on aided institutions was Rs. 1,07,231, of which 43·7 per cent was paid from public funds.

Curriculum

78. The courses of instruction introduced in 1919 are reported to be satisfactory, but it is doubtful whether the curriculum of the 3rd year has not been made too easy. An immediate result of this is that an undue number of men now pass without undergoing training in the Colleges. It is a question whether the time has not now arrived when the concessions allowed to these outsiders should be discontinued. A direct result of the simplification of the curriculum, and more especially the omission of Sanskrit, which aroused a certain amount of opposition at the time, has been to facilitate the admission of candidates of the Backward classes, who had hitherto found difficulty in grappling with the course. The composition of the students in all the institutions in the Central Division was as follows:—

Brahmins	129
Other advanced Hindus	12
Marathas	64
Other caste Hindus	96
Depressed classes	8
Other classes (Mahomedans, etc.)	17
Total ..	326

These figures should go far to allay the common complaint that members of the Backward communities do not receive fair treatment in the matter of admission to the Training Institutions. Large concessions are given to the members of the Back-

ward communities, but it must be remembered that the quality of the instruction has to be maintained and it is not desirable to lessen the value of a Training College Certificate in the interests of students who are unable to take full advantage of the course of training given. Great attention is paid to practical work, a careful record being kept of the work done during the year and the results being taken into consideration in determining the students' fitness for a certificate. Special attention is paid to the need for increasing the students' stock of general information. In the Poona Training College 12 lantern lectures were given and other lectures were delivered by Major Gharpurey, I.M.S., Civil Surgeon, Professor Kulkarni of the Victoria College, Gwalior, Rao Saheb Vaze, Mr. Nagarshet, and Mr. Bendre on such subjects as 'First Aid,' 'Snake bite,' 'Education,' 'Agriculture,' and 'Purification of water.'

The Inspector of Training Schools, who controls the District Training Classes, quotes as follows from the report of the Surat Training School :—

"Although the school has no magic lantern of its own, 21 lectures were given to the students during the year under report. The Assistant Deputy Inspectors, the Government Entomologist at the Athwa Agricultural Farm, Dr. M. M. Mehta, and others gave lantern lectures on various occasions on the War, the British Navy, India, Insect Pests, Infectious Diseases, Physiology, Domestic Hygiene, etc. The slides were obtained from the Officer in charge of Visual Instruction, from the Government Farm, Surat, from the Assistant Deputy Inspectors, from the Sanitary Commissioner, Baroda, from the Seva Mandal, Surat, and such other sources. The students were also shown how to handle and manipulate the lantern."

The excursion grants sanctioned for Training Schools were unfortunately retrenched owing to the financial stringency. But it is reported that teachers and students undertook the excursions as cheerfully and readily as before, paying their own expenses. The results of the certificate examinations for 1st year students were highly to the credit of the Training Classes, the students from which as a whole did far better than those from the Training Colleges.

Notable events and features

79. The Inspector of Training Schools reports that the moral discipline in all the Training Schools was generally very satisfactory. He reports that the students of the Godhra Training School

"again volunteered to break a strike, this time that of the Talatis of the Panch Mahals District who threatened it. The report of their readiness to do so, however, broke up the plans of the Talatis. The Head Masters of these schools deserve to be congratulated on the high moral courage evinced by their students in trying times. The Head Masters of the Nadiad, Godhra and Surat Training Schools also deserve credit for the commendable tact with which they managed their schools in the troublous times through which they passed when the Non-Co-operation movement was at its highest."

To co-ordinate the work in the training schools, a conference of Head Masters and Assistant Masters of Training Schools in the Northern Division and Sind was held in July, 1920. It is reported that the conference did useful work. A full report of the proceedings was published by the Director of Information and distributed to all educational institutions in the Presidency. As a result, the Head Master of the Jalgaon Training School arranged a small exhibition of the work of his school in Drawing, Clay modelling, School gardening, paper sloyd, map making, etc. and invited 250 teachers of the Local Board Schools in the district. To encourage students in their work gold medals of the value of Rs. 25 were offered by the Inspector of Training Schools as prizes to students from Training Schools who stood first in the consolidated list of successful candidates. The prizes were won by students from Godhra, Jalgaon, and Shikarpur Training Schools. The Poona Training College for Men held a successful exhibition in December of Sloyd work, nature study work, clay modelling, etc.

CHAPTER X

Oriental Studies

At the University

80. In the B.A. examination of the Bombay University 47 students obtained Honours in Sanskrit, and 9 in Persian ; in the M.A. examination 6 passed with Sanskrit, 2 with Persian, and 1 with Pali. Since the close of the year, Mr. P. L. Vaidya M.A. has been awarded a State scholarship for the scientific study of Sanskrit in Europe.

Special Institutions

81. Among special institutions for imparting instruction in Oriental Languages, Pathshalas for the study of Sanskrit increased by 34 to 117, and the students attending them by 1,712 to 7,734 ; Maktabs for the study of Arabic or Persian increased by 9 to 105, and the pupils studying in them rose by 1,362 to 3,790. At Poona there was a Hebrew school with 50 pupils.

Expenditure

82. The expenditure on Pathshalas was Rs. 77,671 and on Maktabs Rs. 32,950, of which 36 per cent and 12·9 per cent was met from public funds. Some Rs. 2,200 was spent on personal allowances given to Shastris and Moulvis by way of encouragement.

Research Institute

83. The Bhandarkar Oriental Research Institute, Poona, had a membership of 284 against 224 in the previous year. Its receipts amounted to over Rs. 69,000 and expenditure to over Rs. 29,000. The balance on 1st April, 1921, was over Rs. 58,000. A new Department for the Persian, Arabic, Avesta, and Pahlavi literatures has been started, and has received a donation of Rs. 25,000 from the trustees of the late Sir Ratan Tata, and subscriptions amounting to Rs. 4,753, and 175 manuscripts. The Institute has secured two other notable donations, one of Rs. 25,000 from the Jain Community and another of Rs. 25,000 from the late Sheth Khetsi Khiasi. The Bombay Government have sanctioned an annual grant equal to one-third of the expenditure but not exceeding Rs. 6,000 on account of the scheme for a critical and scientific edition of the *Mahabharata*. Aid has also been received from other Provincial Governments, and from Indian States, and from Universities other than that of Bombay, which itself has given a grant of Rs. 3,000.

Sanskrit Series

Hindu Series

Of the 12 pledges of the Bombay Sanskrit Series not yet completed, 8 are in the Press and 4 have not yet been received from the editors. The Institute expects to fulfil all the 16 Government pledges within the probationary period of 5 years allowed by Government. Of the Oriental Hindu Series, 9 works in all have been undertaken for publication, but only 1 has as yet been sent to the Press.

CHAPTER XI

Education of Girls

Schools and Pupils

84. The number of institutions for girls (including those for Europeans) has increased by 74 to 1,726. The number of girls under instruction has increased by 12,160 to 189,814 (including 69,171 studying in institutions for males). Of these, 180,601 are in public and 9,213 in private schools. 2·1 per cent of the female population of the Presidency is under instruction—1·9 in the Bombay Division, 3·4 in the Northern Division, 1·5 in the Central Division, 1·8 in the Southern Division, 1·9 in Sind, and 2·6 in Aden. In Arts Colleges there are 168 women students, in the Medical College 63, in the Secondary Training College 4, and in the Sydenham College of Commerce 3 ; 13 are in the School of Art, 41 in Medical Schools, 365 in technical and industrial schools, and 80 in commercial schools. The graphs attached to Chapter V show the growth in the number of girls in primary and secondary schools during the last 12 years.

Secondary Schools

85. The number of secondary schools for girls has decreased by 1 to 84—6 Government, 71 aided, and 7 unaided. The number of girls who attend secondary schools has increased by 339 to 10,821, including 1,492 in schools for boys. Ninety-five girls passed at the Matriculation examination. Government Anglo-Vernacular schools were opened at Ahmednagar, Thana, and Dharwar, and two branch schools at Nasik and Bijapur. Only some three schools teach a course

different from that prescribed for boys' schools. The reason for this is that almost all schools hope to send up girls for the School-Leaving Certificate Examination, which qualifies for admission to the University. A special curriculum is under consideration.

Primary Schools

86. Primary schools for girls have increased by 43 to 1,505—11 Government, 386 Municipal, 597 Local Board, 496 aided, and 15 unaided. The number of girls attending Primary schools increased by 9,494 to 167,459. Only 3 per cent of girls studying in primary schools are in the upper primary stage, (*viz.*, standards V to VII). Of the total number of girls receiving Primary education, 36,497 are in the Central Division, 36,019 in the Bombay Division, 28,225 in the Southern Division, 42,226 in the Northern Division, 24,163 in Sind, and 329 in Aden. The curriculum for the Gujarati, Marathi, and Kanarese Primary Girls' schools has been revised and that for Sind is under revision.

Teachers

87. The total number of women teachers in Local Board schools is 705. Of these, 435 are trained, 125 untrained, and 145 unqualified. The development of girls' education is still hampered by the dearth of women teachers. In Sind scholarships have been instituted to induce women to study in primary schools with a view to joining the Training College. Of these, 40 are of the value of Rs. 5 per mensem and are awarded to women in the infant class and 1st standard, 40 of the value of Rs. 6 per mensem awarded to women in standard II, and 40 of the value of Rs. 7 per mensem awarded to women in standard III. The salaries of secondary women teachers have been revised with effect from 1st March, 1921. The average pay of trained and untrained women teachers in Primary schools in the different divisions of the Presidency will be found in the table printed in the supplement to this report.

Expenditure

88. The total expenditure on schools for girls has increased by Rs. 6,61,554 to Rs. 34,37,267. 38·8 per cent of this was borne by Provincial, 21·4 per cent by Municipal, and 5·6 per cent by Local Board Funds. If account is taken of the expenditure on girls studying in institutions for males, the total expenditure on account of girls is increased to Rs. 44,75,836. Public funds contributed 35·4 per cent of the expenditure on secondary, and 80·9 per cent of that on primary, schools. The average annual cost of educating each pupil in schools for girls, excluding those for Europeans, was Rs. 78·6 for secondary, and Rs. 19·9 for primary education. The average annual fee per head was Rs. 22·8 and As. 8·25 for secondary and primary schools respectively. The rate of grant per pupil in aided schools was Rs. 23 in secondary and Rs. 6 in primary schools.

Teaching of Adults

89. The Seva Sadan Societies at Bombay, Poona, and Satara, the Women's Association at Nasik, the Mahila Samaj at Jalgaon, the Vanita Vishram, Bombay, the Bhagini Samaj at Alibag, Mrs. Nikambe's class for married ladies (now thrown open to all), the Sanjani Sangit Varga, the Embroidery Class, Manmad, the Parsi Domestic Arts Schools, the Zenana Mission Classes at Nasik, Karachi, and Sukkur, and certain other institutions provide facilities for the instruction of women in Sewing, Knitting, First Aid, Hygiene, Domestic Economy, Cookery, English, Vernacular, Music, etc. The Poona Seva Sadan is distinguished by the variety of its activities. It has primary and English classes, work-room classes, music classes, a college for the training of teachers, First Aid and Home Nursing classes, and classes for the training of nurses and midwives, with hostels attached to them. There are some 950 women in the various branches, coming from different parts of the Presidency.

Needle Work

90. A three years' course of instruction in needle-work for sewing teachers has been started in Sind, a certain salary being guaranteed on the completion of the course.

Physical Training and Supervision

91. In most of the schools Drill is performed, but a systematic organization of Drill and other games is generally lacking, in some cases owing to the absence of suitable play-grounds. The Mission Schools, Karachi, are reported to have systematically organised Drill and infant games. Miss Corkery reports :—

> "The six schools which belong to the Girls' Athletic Association (in Bombay) pay due attention to physical education—the remaining schools either possess no suitable space for play-grounds or drill-halls or have no teachers qualified to guide the children or organize games. All of the schools devote some periods to drill, the average time being an hour a week. The exercises taught are in many cases not adapted to the age or strength of the pupil. The Emanuel Girls' High School is the only Anglo-Vernacular School that has joined the Girl Guides, the movement is not popular among Indian parents, who are averse to the publicity and freedom Guide work entails."

Miss Twells (Sind) observes :—

"The Christian teachers and students in the C. E. Z. Mission Schools, Karachi, are all enrolled as Girl Guides. The Karachi company of Girl Guides recruited exclusively from the Mama Parsi Girls' High School won the Martin Cup awarded in August last to the most efficient company in Karachi. A company of 'Blue Birds' has recently been formed. There are now 70 Guides and Blue Birds in the school and another company of Guides is about to be formed. The C. E. Z. Mission, Hyderabad, is giving the movement its attention. I hope before long other schools will have joined the movement".

Mr. Grieve (Sind) reports :—

"The Hyderabad Municipality is the only one which has provided for Medical inspection. Children do not come forward to avail themselves of treatment, though a Lady Doctor has been appointed for the purpose."

92. Sind has sent three students to the Lady Hardinge Medical College, Delhi. *Notable Events.* Two girls from the Girls' High School, Ahmedabad, won prizes for an essay on "The Care of the Baby" given by the Countess of Dufferin Fund, Delhi. Nearly all the children of this school are members of the "Children's League of Service" and helped the League in a concert given by it and by making articles for sale. Miss Corkery reports :—

"A course of lectures on Nature Study was kindly given by Professor Mullan, and was attended by 62 teachers. The course has proved inspiring to the teachers and an improvement can already be noted in the observation work done in these schools and in the additions to the museums."

In her opinion the most successful results in Nature Study were attained at the Mission Training College, Godhra, where the subject was chiefly taught by the Lady Superintendent, herself a keen botanist and lover of nature.

A course of lectures on Indian music was given by Mr. Fredilis, Principal, School of Indian Music, Baroda, whose services were placed at the disposal of this Government by the Baroda State. The lectures are reported to have been very instructive and were much appreciated. The course was attended by 49 teachers.

CHAPTER XII

Education of Europeans

93. There were 38 European High and Middle schools (18 for boys and 20 for girls) as well as 3 Normal classes and 3 Industrial schools. All of these were aided institutions. One general and one special school (the Training Home for Nurses at Nasik) were closed on account of paucity of pupils. English-teaching schools increased by 1 to 43 (23 for boys and 20 for girls). Of these, 39 were aided and 4 recognised. Co-education exists within certain limits in almost all the European and in some English-teaching schools. The number of pupils in European High and Middle schools fell further by 59 to 4,456 (3,811 Europeans and 645 Indians) while that in English-teaching schools rose by 345 to 9,601. The number of Europeans under instruction in all classes of institutions increased by 36 to 4,829 (2,279 males and 2,550 females). *Schools and Pupils*

94. The total expenditure of European schools increased by 20·3 per cent to 13·5 lakhs, and of English-teaching schools by 13·2 per cent to 7·4 lakhs, of which 35·9 and 28·6 per cent was borne by Provincial funds. An additional grant of Rs. 40,500 was distributed amongst European and English-teaching schools during the year, and afforded some measure of relief. An attempt was made to bring the grants of the smaller and poorer Primary schools up to the maximum admissible under the rules of the Code. It was found impossible however to do this in the case of the majority of High and Middle schools. The Municipalities of Karachi and Kotri were the only ones which recognised, to however slight an extent, their duty of aiding the primary department of European schools, and those of Karachi, Hubli, and Sholapur of aiding English-teaching schools. The average annual tuition fee was Rs. 54 in a European school and Rs. 30 in an English-teaching general school. Grants to children of wounded and disabled soldiers were paid to the extent of some Rs. 12,000. *Expenditure*

Hostels

95. There are hostels attached to 27 (11 boys' and 16 girls') European schools and 6 (1 + 5) English-teaching schools. They had 2,424 (937 boys + 1,487 girls) boarders among them. The total expenditure exclusive of messing charges amounted to Rs. 3·91 lakhs, or Rs. 13-7-0 per boarder monthly. Boarding fees amounted to Rs. 1·74 lakhs. Orphan grants paid amounted to Rs. 98,000 on account of about 700 boarders. In spite of the increased rate of these grants sanctioned in 1919-20 managers found it exceedingly difficult to meet the expenditure. The cost, inclusive of messing charges, varied from Rs. 30 to Rs. 60 a month per boarder according to the type of school.

Examinations and Scholarships

96. Fifty-three candidates appeared for the High School Examination, of whom 22 were awarded certificates for admission to a college affiliated to the University of Bombay, and 3 were awarded scholarships of the value of Rs. 20, which in special cases can be increased up to Rs. 40 provided the scholars join an Indian College. This restriction is, in the opinion of the Inspector, undesirable, as it has prevented a number of candidates from availing themselves of the scholarships. For the Cambridge Local Higher, Senior, Junior, and Preliminary Examinations the entries and passes were respectively 11 and 3, 79 and 37, 183 and 86, and 167 and 100. I quote from Mr. Ludlow's report on the subject of these two examinations :—

"The Departmental and Cambridge Local Examinations are held in the months of November and December respectively. During the year under report more than half the candidates who sat for the High School Scholarship Examination also sat for the Cambridge Senior. I consider it most undesirable for boys and girls of 16 and 17 years of age to sit for two such strenuous examinations within so short a period. The Cambridge Local Examinations are growing in popularity year by year, and it appears a waste of time, energy, and money to retain the Departmental Examinations any longer. Competition for the Primary and Middle School Scholarships has sunk to a very low figure, and candidates who gain these Scholarships gain them far too easily. This would not be the case if scholarships were awarded on the results of the Junior and Preliminary Cambridge Examinations. As regards the High School Scholarship Examination, the standard demanded is practically equivalent to that of the Senior Cambridge, and it is significant that out of the 27 candidates who took both examinations the results, except in the case of one candidate, were identical. If the Departmental Examinations were abolished it is estimated that there would be a saving of Rs. 1,500 which could be employed elsewhere in a manner much more advantageous to the interests of European Education."

Two European High Schools sent up 12 candidates, and the English-teaching High Schools 167, to the A. V. School-Leaving Examination held by the Joint Board. Of the former, 11, and of the latter, 104 were successful. The Departmental Kindergarten examination was held at Poona and Murree. There were 3 candidates at each centre. On this examination Mr. Ludlow reports :—

"During the year, the National Froebel Union, to whom a printed report of last year's examination was sent, wrote expressing their strong approval of the lines on which this examination is being conducted. It is to be regretted that this examination, so admirably adapted to the needs of teachers in India, does not receive greater support both within and without the Presidency. The examination, however, is still in its infancy, and I trust, as it becomes more widely known, and as the excellent training the candidates undergo becomes more widely experienced, it will meet with greater support.....It is a pleasure to be able to report that the various lady specialists whom I have asked to examine, have in every instance responded ungrudgingly and without the slightest demur."

Physical Training and Religious Instruction

97. Cadet corps have practically ceased to exist in most schools. Boys over 16 years of age are now enrolled in the Indian Auxiliary Force. A large number of schools have very flourishing troops of Boy Scouts and Girl Guides. During the Post and Telegraph strikes in Bombay, the local troops performed work of great public utility. Games are reported to receive due attention in almost all schools, but most of them, and especially those in Bombay, were seriously handicapped by the lack of adequate playing-grounds, while some schools possess none at all.

Manual Training

98. Drawing is the only subject generally taught, with the addition of needlework in girls' schools. Some girls' schools have Domestic Science Classes.

Teachers and Training

99. The total number of teachers in general schools increased by 43 to 912. Of these, 35 per cent were trained and 12 per cent possessed a degree. The demand for trained teachers is said to have never been greater nor their want to have been more keenly felt. There is however no likelihood of the supply being equal

to the demand until schools are in a position to offer teachers a livelihood which can compare not unfavourably with the pay and prospects held out by other professions. There is no training college for male teachers. During the last five years only one male teacher has been admitted to the Sanawar Training class with a scholarship. For women teachers there are 3 training institutions. These had 35 students, of whom 12 received Government stipends of Rs. 40 per mensem, an amount reported to be insufficient to defray the present-day cost of board, lodging, and tuition. Of the 20 teachers who appeared in both the Parts of the Secondary Teachers' Certificate examination, 11 were successful. The average pay of teachers was Rs. 101 in general, and Rs. 116 in special schools. The Provident Fund scheme under consideration is eagerly looked for.

Technical and Industrial Education

100. The Young Men's Christian Association, Procter Branch, have opened technical classes in conjunction with the workshops of the G. I. P. and B. B. and C. I. Railway Companies, and the apprentices who live in the home receive practical education in these work-shops. They also work in the Dockyard of the Bombay Port Trust and other private firms. 25 girls attended the Young Women's Christian Association Commercial classes in Bombay for training in shorthand, typewriting, book-keeping, etc. The Home Training Class, Convent School, Bandra, had 21 girls learning cookery, laundry work, dress-making, etc. The Training Home for Nurses at Nasik was closed for want of numbers. A proposal from the Telegraph Department to open training classes in telegraphy and telephony for domiciled Europeans and Anglo-Indians was again put forward during the year. It met with scanty support from European schools and no class has as yet been opened.

General Remarks

101. Mr. Ludlow concludes an interesting report with the following words :—

"The results of the Departmental and Cambridge Local Examinations are not very encouraging, and appear to suggest a falling off in the general standard of work in the upper Classes. The constant changes in the school staffs, the extraordinary difficulty of obtaining even untrained teachers on the salaries offered, together with the restlessness of the times in which we are living, are all terribly effective barriers to real Educational progress. It is unfair however to form an opinion of the work done merely on the results of public examinations. Managers and heads of schools have exerted all their energies to cope with the great difficulties that have confronted them, and I very much doubt whether the problem of European Education in the Presidency has ever received more earnest consideration at their hands than it has done during the year under report. This is a happy augury for the future. The financial strain of the past year has been felt very acutely by all schools, both European and English-teaching. Funds are so low in some of the primary English-teaching Schools that it is still possible to find full-time non-resident mistresses on salaries of Rs. 15 or Rs. 20 per month. The extent of the financial efforts which managers of schools have made may be gauged from paragraph 5 of this report in which the comparative expenditure for the year 1919 and 1920 are given. The schools are looking to Government for additional support and I can only reiterate Mr. Dudley's concluding remarks in his report of last year, that no real progress is possible until half grants are sanctioned—and I would also add—until the Provident Fund is brought into operation. During the period under review the Indo-British Institution has merged its identity with that of Bombay Educational Society's schools at Byculla. It is hoped this amalgamation is but a fore-runner of others. There are signs, especially in Bombay, that the advantages of more concentration of Educational effort are being realised. In European and English-teaching schools, the most important source of income (setting aside Government grants) is from school fees, and the largest item of expenditure comes under the heading 'Salaries of Staff.' Obviously, it is economically unsound for a small High and Middle school to maintain a large and expensive staff to teach a number of numerically weak standards, and where religious considerations and isolation do not present an insuperable barrier, amalgamation is to be encouraged in every way. Much can be done in the future in this direction. I cannot close this report without referring to the great loss European Education in this Presidency sustained in the sudden death of Miss Kimmins in England in March last. Miss Kimmins was Lady Principal of the Panchgani Girls' High School for over 20 years and dedicated her life to its service. She fostered it in its infancy, guided it in its adolescence and finally left behind her a school famed throughout the Province and, beyond it, for its high traditions and the excellence of its work, organisation and buildings."

CHAPTER XIII

EDUCATION OF MAHOMEDANS

Progress :— Schools and pupils

102. The number of Mahomedans under instruction rose by 10,478 to 192,131 (including 44,035 girls)—170,869 in public and 21,262 in private institutions. Of the number in public institutions 161,453 are in Primary and 5,924 in Secondary schools, 292 in Arts and 76 in Professional Colleges, 576 in Training institutions, and 2,618 in other Special institutions. The attendance in Secondary schools and Professional Colleges showed a decrease of 207 and 13 respectively, due presumably to the Khilafat movement. When the extent to which the community has been influenced by this movement is remembered, the general increase in the numbers is very remarkable. Of the girls, 131 were in secondary schools, 49 in training schools, 3 in medical schools, and 274 in other special schools. The percentage of Mahomedan population under instruction in public institutions comes to 4·2 (male 6·1 and female 2·1) and compares not unfavourably with 4·6 for the entire Mahomedan and non-Mahomedan population taken together. Mahomedans form 20·5 per cent of the total population. Mahomedan children constitute 20·2 per cent of the total number of pupils under instruction.

Examinations

103. In the University Examinations for Degrees, 2 Mahomedans passed the M. A., 26 the B. A., 1 the B. Sc., 10 the LL. B., 1 the B. E. (Civil), and 4 the M.B., B.S. In the School Leaving Certificate Examination 124 passed in the subjects qualifying for entrance into colleges and 17 in those for Government service, against 128 and 8 in the preceding year. At the training examinations of primary teachers 143, 155, and 75 appeared at the 1st, 2nd and 3rd year examinations, of whom 119, 148, and 61 were successful. 134 Mahomedans were sent out to serve as trained teachers. At the vernacular Final Examination 687 passed, against 544 in the preceding year. Of the successful candidates, 291 were in Sind.

Special Institutions

104. The number of special institutions for Mahomedans and the number of pupils attending them will be found in Appendix A, which gives also the total number of Mahomedan pupils under instruction, including those in ordinary institutions. Of the total number of Mahomedans under instruction in public institutions, 90·4 per cent are in primary schools, of whom 58·4 per cent are in special primary schools—the Urdu Schools in the Presidency proper, and the Mulla schools in Sind.

Presidency excluding Sind

105. In the Presidency proper, there are 7 secondary schools for Mahomedans in the Bombay Division, and 1 in the Southern Division. The number of Urdu primary schools increased by 14 to 1,026 and the number of pupils attending them by 1,925 to 65,116.

Teachers

106. The total number of teachers in Urdu schools is 2,138 or one teacher for 30·4 pupils. Of these, 1,421 or 66·5 per cent are untrained, 717 trained. Of the former, 909 are unqualified and 512 qualified. The percentage of trained men to the total number of teachers in each division is 17·5, 41·7, 39·6, and 48·7 respectively in the Bombay, Central, Northern, and Southern Divisions. The need for increasing the number of qualified teachers is clear. The Central School at Tankaria in the Broach District, which exists for the special purpose of preparing boys for the Vernacular Final Examination, has passed 76 in this examination, since its foundation in 1905. A similar school exists at Nasirabad (East Khandesh), one has been recently opened in the Colaba District, and two others have been sanctioned.

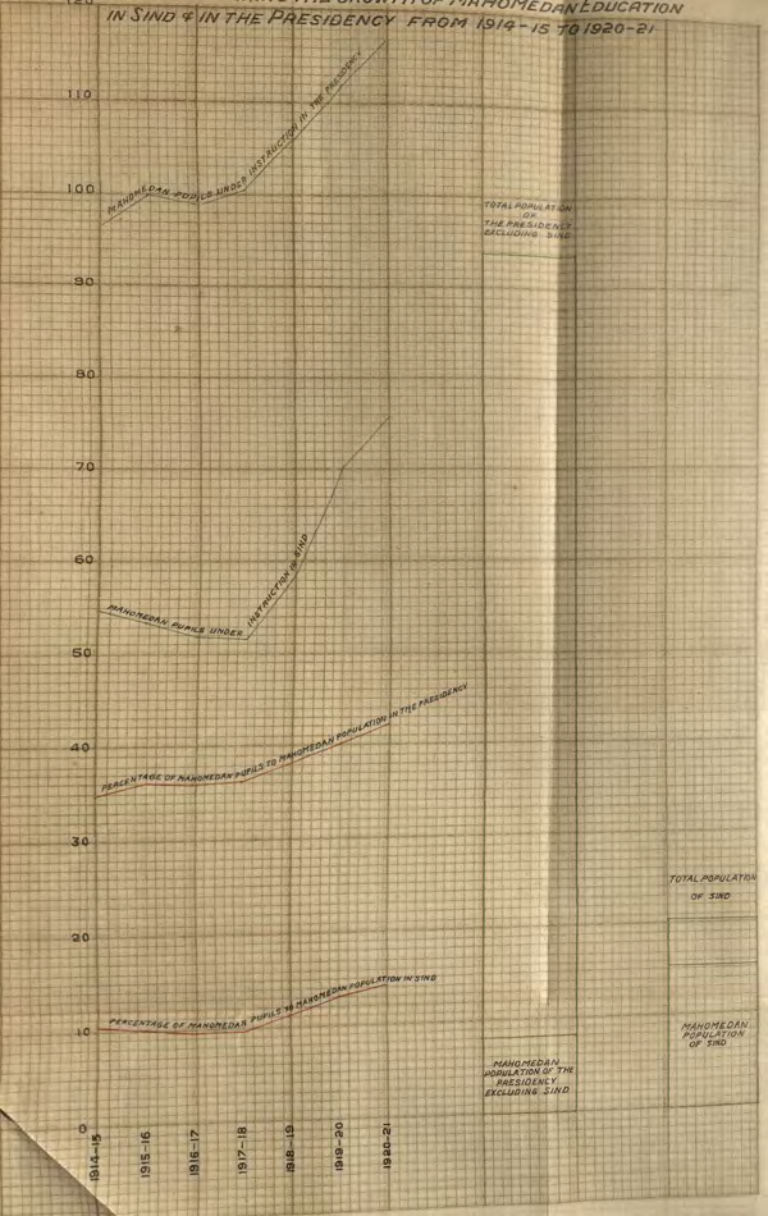
Training

107. An Urdu training school teaching the 1st year course was opened at Hubli and a 3rd year class was added to the Urdu Training Class, Ahmedabad. In addition to these, there is the class at Poona, which teaches the first two years' course. The Training School for girls (at Hubli) opened in the preceding year is reported to be making fair progress. In the Central Urdu Girls' School, Poona, provision has recently been made for the teaching of English.

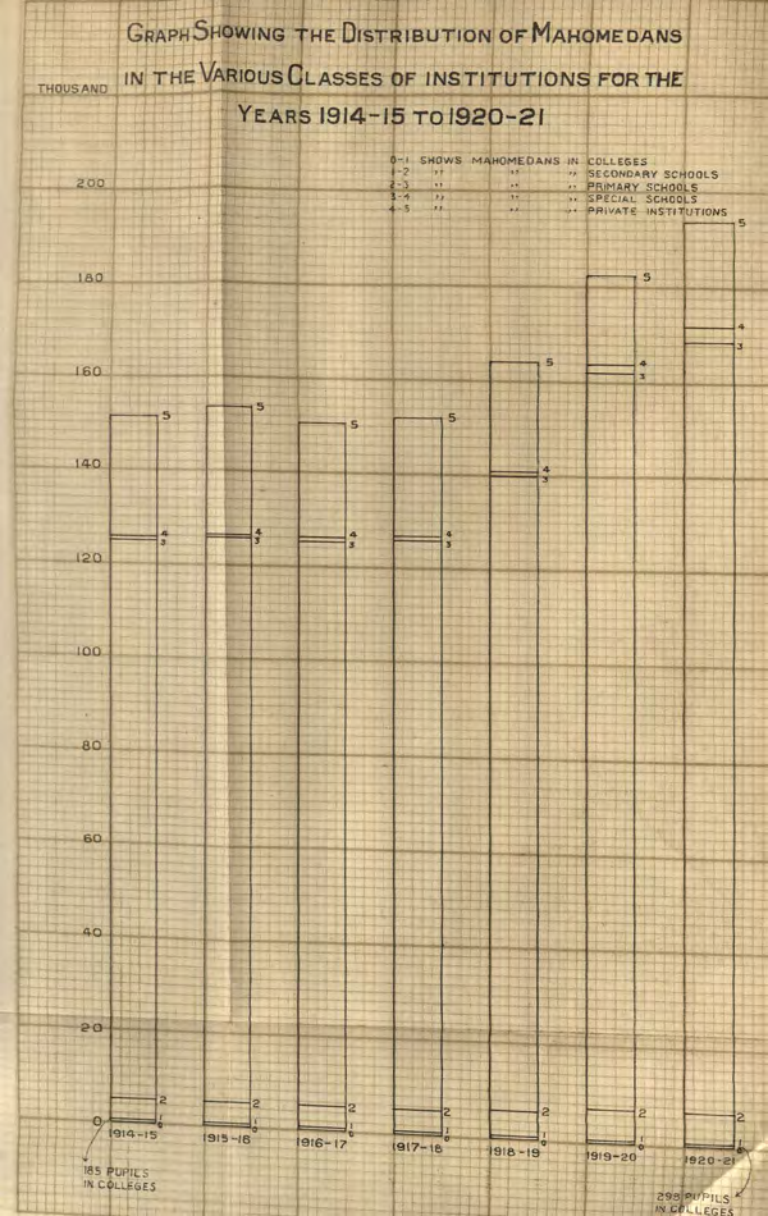
Curriculum

108. The alternative sets of standards were introduced in 1918. It is left to the option of the local Mahomedans to decide whether the instruction shall be given through the medium of Urdu or the local vernacular. In the former case, special instruction in the local vernacular is compulsory.

GRAPH SHOWING THE GROWTH OF MAHOMEDAN EDUCATION IN SIND & IN THE PRESIDENCY FROM 1914-15 TO 1920-21



Graph Showing the Distribution of Mahomedans in the Various Classes of Institutions for the Years 1914-15 to 1920-21



109. A donation of 40 lakhs for the foundation of a Mahomedan orphanage near Surat was offered by Mr. Haji Ghulam Mahomed, a well-known merchant of Rander. Special grants have been made for the award of scholarships, books, clothes, etc. to deserving Mahomedan girls in primary schools. An Urdu Text-Book Committee has been appointed with the Educational Inspector, Bombay Division, as President. As noted in chapter XVIII, a special Board has been appointed for the translation of the departmental readers into Urdu. Special Urdu teachers have been appointed in some High Schools. *Mahomedans and Industries*

110. In Sind there are 66,504 Mahomedans under instruction in public institutions, 71 being in Colleges, 1,613 in Secondary schools, 64,416 in Primary schools, 186 in Training, and 218 in Special institutions. There are 4 special Madressas giving secondary education, and 627 special primary institutions with an attendance of 18,702 pupils. Mahomedans form 52·7 per cent of the total number of pupils under instruction in public institutions. *Sind*

111. The total number of Mahomedan teachers in primary institutions in Sind is 1,282. At the Vernacular Final Examination 291 passed against 237 in the previous year. *Teachers*

112. Koran classes are attached to 96 Local Board schools in Sind, a special allowance being given for the purpose. Special scholarships are given in primary schools, while 49 scholarships of the value of Rs. 10 per mensem for standards I to III and Rs. 12-8-0 per mensem for standard IV to VII are awarded annually in secondary schools. *Koran Classes, Scholarships*

113. The number of Mulla schools has increased by 107 to 1,430 (1,196 for boys and 234 for girls) but the number of pupils in them has decreased by 1,358 to 34,685 (25,271 boys and 9,414 girls). The Khilafat movement is responsible for this decrease. The total expenditure on these schools decreased by Rs. 59,231 to Rs. 2,99,282 while the expenditure from the Provincial Fund decreased by Rs. 5,318 to Rs. 1,43,529. The main allotments sanctioned for these schools were :— *Mulla Schools*

> Capitation grant Rs. 75,000 ; grant for assistants Rs. 26,148 ; scholarships in Local Board primary schools, Rs. 11,460 ; circulating libraries Rs. 4,000 ; improvement in accommodation Rs. 4,000 ; equipment Rs. 3,000 ; rewards Rs. 1,000 ; books and writing materials Rs. 5,000 ; prize for good attendance Rs. 3,000. The average grant per school is Rs. 100 and the cost of educating a pupil in these schools to Government is Rs. 4-2-3.

On the subject of Mulla schools Mr. Ghulamnabi Kazi, Deputy Educational Inspector, Mulla Schools, Hyderabad, observes :—

"In the past the Mulla schools have been looked upon as Supplementary schools to Local Board Institutions to spread literacy among the rural Mussulmans and to serve as feeders of Local Boards schools. It is, however, observed for a long time that as soon as the Mulla ceases to take interest in his boys, they grow indifferent about prosecuting their studies further, and thus the second object is defeated. At present the Mulla schools teach up to third and fourth vernacular Readers. If however the education of Mulla Schools is allowed to end there, then the effects of this education will wear away soon. I am therefore of opinion that a few prominent Mulla schools may be allowed to develop upon their own lines and allowed to teach fifth and sixth Readers with corresponding progress in arithmetic and writing. Some of the Mulla girls' schools are really doing excellent work, and I feel convinced that female education among Mahomedans is to spread at present mostly through the medium of Mulla schools. Some of the enthusiastic Mullas are already attempting to teach higher standards than what the Mulla Code recognises ; and one Mulla of Tando Bago has advanced his school so far that one of his pupils passed the Vernacular Final examination last year, and he is preparing two more candidates for the same examination this year."

I consider that the foregoing represents the correct position regarding the Mulla School system. It cannot be said that so far it has been effective in dealing with illiteracy, except to a very small extent. If, however, it is further developed on the lines laid down, not only will it prepare boys for the ordinary primary schools, and by means of the special system of scholarships recently sanctioned for Sind for secondary schools, but will in time supplement and largely take the place of District Local Board schools. Unless and until it does this it cannot be said to justify the expenditure incurred. I regard as the most hopeful sign for the ultimate success of these schools the readiness with which the Mullas have themselves

submitted to training. Four classes were held in different parts of Sind for three months each during the year and 92 Mullas underwent training. That these men, many of them grey-beards, should consent to sit on a bench and be taught like school boys is, I consider, a very remarkable thing. No doubt the main incentive is the hope of a better grant, but there is equally no doubt that this training, which consists chiefly of instruction in ordinary school subjects, will greatly raise the standard of education in Mulla schools. But, as I have indicated, the expenditure on these schools is considerable and cannot be regarded as justified by the results so far achieved. Care must be taken to see that grants are not given to undeserving schools.

CHAPTER XIV

Education of the Intermediate and Backward Classes

Introduction

114. This chapter includes remarks not only on the really backward communities, comprising chiefly the Aboriginal and Hill Tribes, the Criminal Tribes, and the Depressed classes, but also those intermediate classes, composed chiefly of the cultivator and artisan classes, which are backward only in comparison with the more advanced communites. These classes are included in the electorate for Maratha members of the Legislative Council.

Intermediate classes

115. In the Central Division these have all been loosely classed under the term Marathas, which may in this connection be regarded as including agriculturists generally. The numbers have risen from 48,065 to 48,965, of whom 97 are in Colleges, 1,281 in Secondary schools, 47,084 in Primary schools, 116 in Training schools, and 354 in other Special institutions. In the Poona District the hostels at Palasdeo, Alandi, and Baramati provide accommodation for about 100 boys. The Vidya Prasarak Samaj at Satara maintains a hostel and 3 night schools. In East Khandesh a Maratha boarding-house for 32 boys has been started and one for 17 inmates at Chopada and it is reported that the Maharaja of Gwalior has promised Rs. 20,000 for a building for the former institution. The number of Marathas in the Southern Division rose from 7,279 to 7,366. But, generally speaking, in the Southern Division, the place of the Marathas as agriculturists may be considered as taken by the Lingayats. Out of a total of 61,740 Lingayat children under instruction, 52,813 are in this Division, of whom 76 are in Colleges, 1,777 in Secondary schools, 50,723 in Primary schools, and 237 in Special schools. In the Central Division out of a total of 8,184 Lingayats, 55 are in Colleges, 215 in Secondary schools, 7,846 in Primary schools, and 68 in Special schools. Neither the Educational Inspector, Bombay Division, nor the Educational Inspector, Northern Division, gives any figures showing the number of children of the Intermediate classes attending school. In the Northern Division the Kolis of the Ahmedabad, Kaira, and Panch-mahals Districts fall under this head. They are generally known as Dharalas in the latter two districts. A special school is maintained for Dharalas near Godhra in the Panch-mahals. In addition to the ordinary subjects, instruction is given in agriculture. The question of the education of these agricultural classes is dealt with in the paragraph on "Wastage" in Chapter VI (Primary schools).

Aboriginal and Hill Tribes

116. In the Central Division the number of children of Aboriginal and Hill tribes receiving instruction in all kinds of schools increased from 2,475 to 2,859, the number of special schools for them being 17 and of pupils in them 501. Of the total number of pupils under instruction, 12 were in Secondary schools, 2,837 in Primary schools, and 10 in Special schools. The hostel attached to the Central School at Akola in the Ahmednagar District was constructed out of the funds of the Sir Sassoon David charities and provides accommodation for 16 students. There are at present 10 stipendiary students, 9 Kolis and 1 Bhil, and the Superintendent is a 2nd year trained Koli master. The hostels at Nandurbar and Kukurmunda in West Khandesh provide accommodation for 24 and 16 students and arrangements are being made for starting a hostel at Dhadgaon from out of the allotment made by Government for the education of Backward Communities. The itinerant teacher appointed to supervise Bhil schools in West Khandesh supervises 27 schools scattered over 4 Talukas, and has succeeded in increasing the numbers and in making

attendance more regular. The question of a "Bhili" Primer is under consideration. In the Bombay Division there are in all 78 schools and 5 classes for Aboriginals, containing 2,120 children, in addition to 1,463 children in other schools. A carpentry class has been added to the Neral school for Katkaris in the Kolaba District. There are boarding-houses for the Aboriginal tribes children in the Thana, Kolaba, and Nasik Districts with 70 boarders in all. Nine schools for these classes are maintained in the Dangs by Mission bodies. In Kolaba the annual cost per head is Rs. 85. In Thana Rs. 7 is given as scholarship per head per mensem. An itinerant teacher and some money for scholarships and prizes have been sanctioned for these classes in the Nasik District. In the Northern Division the number rose from 11,431 to 11,458, of whom only 10 were in Secondary schools. Four special boarding-schools are maintained by the District Local Boards for children of this class. Of these, that at Dohad in the Panch-mahals for Bhils is attended by 35 boys. The school is reported to be a model one. Three boys passed the Vernacular Final Examination from it. In addition to the ordinary course of a full primary school, agriculture, theoretical as well as practical, is taught under the supervision of the Agricultural Department at the Government Farm. The second is for Kaliparaj children in the Broach District. The Godsamba school for Kaliparaj children in the Mandvi Taluka of the Surat District is still in a flourishing condition and 9 out of 10 boys sent up from it passed the Vernacular Final Examination. The school (of which a full account was given in the Quinquennial Report for 1902-07) was started in 1904 with the object of preparing Kaliparaj teachers for villages inhabited chiefly by people of that community. Its success has been phenomenal. 128 of its boys have passed the Vernacular Final Examination and 16 have been trained as teachers. The Educational Inspector reports that the school is popular among the Kaliparaj but that it has failed to achieve the object for which it was established, *viz.*, the preparation of teachers for Kaliparaj schools. He reports that

> "the training they receive at school, and their constant association with the teachers, gradually revolutionise their ways of life and currents of thought to such an extent that they look to be a reformed set of people in course of time. They give up their dirty habits and learn to be neat and tidy. They become drilled into habits of regularity, sobriety, and industry which are, as a rule, unknown to their kith and kin at home. It is due to this evolution of education that they are disinclined to go and serve as teachers in Kaliparaj schools."

The matter is being enquired into. In the Southern Division the number decreased from 276 to 242 owing, it is reported, to the children being tempted away by the high wages prevailing.

Depressed classes.

117. The number of children of the Depressed classes, or untouchables, increased by 4,727 to 38,488, including 4,392 girls. In the Central Division the number rose from 13,457 to 15,700, of whom 76 were in Secondary, 15,581 in Primary, and 43 in Special schools. There are 176 schools and classes for Depressed class pupils with an attendance of 6,182 pupils. A special officer has been appointed to look after the education of the Depressed classes for three of the districts of this Division. In the Bombay Division the total number under instruction is 7,621, of whom 97 are in Secondary, 7,511 in Primary, and 13 in Special schools. There are in all 101 schools and 20 classes for these classes, with 4,612 pupils in them. The boarding-school opened at Khardi (Thana District) has 24 boarders under the supervision of a 3rd year trained Mahar teacher and is reported to be doing very well. Two Chambhars from the Ratnagiri District were sent to the Poona Training College in the 1st year Class. In the Nasik District two Mahar boys passed the Vernacular Final Examination. Three Mahar boys were under training in the Training College for Men, Dhulia. In the Northern Division the total number of children increased by 1,951 to 8,278, of whom 11 were in Secondary schools, 8,262 in Primary schools, and 5 in Training institutions and other Special schools. There were in all 59 Special schools and 7 classes for the Depressed classes, with an attendance of 2,609 pupils. There are several trained teachers belonging to the Depressed Classes in this Division and every year one or two candidates are specially selected for training. In the Southern Division the total number in public institutions rose from 3,920 to 4,377, of whom 22 were in Secondary, 4,344 in Primary, and 11 in Special schools. There were 82 schools and 22 classes specially maintained for these classes,

with an attendance of 3,051. Nine candidates appeared for the Vernacular Final Examination, of whom 3 passed. It is reported from Dharwar that a Dhed boy got a middle school scholarship and a Dhed girl was admitted into the preparatory class of the Training College for Women, Dharwar. An attempt is being made in Bijapur to give rudimentary instruction in carpentry and masonry to these children out of a grant made by the Commissioner, Southern Division. In Sind the number decreased by 38 to 495. There are 6 Special Local Board schools for these classes in the Thar and Parkar District with an attendance of 123. One Bhangi (sweeper) of the Sukkur District passed the Vernacular Final Examination.

Criminal Tribes

118. The total number of pupils in public institutions increased by 714 to 4,881, of whom 2 were in Secondary, 4,791 in Primary, 3 in Training, and 85 in other Special schools. In the Central Division the number increased by 545 to 2,254, the number of special schools for these tribes being 36, with 989 children. In the two Criminal Tribes Settlements managed by the American Mission at Sholapur the number of pupils increased by 123 to 881. In the Bombay Division there are 41 pupils under instruction in ordinary schools. In the Northern Division the total number under instruction is 361, of whom 360 are in Primary and 1 in Training schools. There is a Special school with 23 pupils at Uttarsanda in the Kaira District for the Waghris of Kaira. In addition to the vernacular course, the boys are taught practical farming, for which a small field has been rented. The boys show, it is reported, signs of steady improvement and one passed the Vernacular Final Examination out of 2 candidates sent up. In the Southern Division the number of institutions increased by 6 to 25 and the attendance by 150 to 2,169, of whom 2 were in Secondary, 2,082 in Primary, 1 in Training, and 84 in other Special schools. The number of schools maintained by Government and controlled by the Special officer appointed for the purpose of settling these tribes rose from 11 to 17 and the attendance in them from 921 to 1,334. The number of Special schools (5 schools and 3 classes) maintained by the District Local Board, Belgaum, was 8 with an attendance of 270.

The following extracts from the report of Mr. Starte, Criminal Tribes Settlement Officer, are of interest :—

"The education given in Government schools is that of the usual primary educational standard with special attention paid to cleanliness and gardening and first aid. In half of the schools, special facilities have been made for the bathing of the children and provision is being made in the other schools as funds permit. First aid is being taught to the senior boys and girls by the settlement Doctors or Nurses in the larger settlements. A rather disturbing feature has been the difficulty experienced by the teachers in getting the children to pass from the infants into the first standard. There are doubtless many difficulties in the way. Each caste has its own dialect, so that the child has to be taught Kanarese or Marathi as the case may be, as a new language. Again new gangs come into the settlement, and new children varying from 5 to 12 have to be placed in the infants' class. The schools have been re-organized and special attention paid to this problem. A great improvement has resulted. . . . Training in some trade is taking an important share in the progress of the youths in the Settlements. In Bijapur Settlement there are 52 boys under training as masons. The method of training, which is both inexpensive and effective, is of interest. After about three months' preliminary training in the settlement they are placed in a class engaged in the stone work for the construction of a rich merchant's house. The Settlement has provided an instructor at its own expense and the merchant pays such wages to the boys as their work is worth. The wage is fixed in consultation with the Settlement Inspector, and, where necessary, for the boys' maintenance, the wages are supplemented by a small scholarship grant. . . . A number are being trained as carpenters. So far, we have found that apprenticing them out to carpenters in the town has been the most successful method of training as carpenters. . . . An industrial exhibition, in which was included work from the schools, was held in Bijapur last October. It aroused great interest and keenness and all the settlements competed. Bijapur won the challenge shield for the industrial work and Hubli for the school work. The excitement when the results were declared, and the proud parading of the shields through the settlement by the successful winners will not easily be forgotten."

In Sind the total number decreased by 8 to 56. The Hur School at Sanghar (Thar and Parkar District) is reported to be doing good work. Two Hurs have passed the Vernacular Final Examination and are serving as teachers in Local Board Schools.

119. Twenty-four special scholarships in Arts Colleges of the value of Rs. 20 per mensem tenable for four years have been sanctioned as an experimental measure. Four are for the Depressed classes and 20 for Backward classes including Marathas but excluding Mahomedans and Depressed classes. *Special facilities*

CHAPTER XV

Education of Defectives

120. Schools for defectives decreased by 1 to 6, but pupils studying in them increased by 11 to 176. The Poona School for deaf-mutes was closed. Of the 6 schools, 2 for the blind, both in Bombay City, had 85 pupils (57 boys + 28 girls). Of the 4 schools for deaf-mutes, 2 were in Bombay, 1 in Ahmedabad, and 1 at Gaokhadi, Ratnagiri. The total expenditure on the 6 schools was Rs. 39,326, of which 16 per cent was contributed by Provincial and 20 per cent by Municipal funds. The Ahmedabad School, it is reported, is poorly attended. It had, however, 9 pupils more than in the previous year. Certain social workers propose to start a school for the blind at Karachi. Various District Local Boards and Municipalities in Sind have promised to contribute towards its maintenance. *Education of Defectives*

CHAPTER XVI

Reformatory Schools

121. The two Reformatory Schools had 508 boys between them. Matunga had 342 including private apprentices, and Yeravda, 166. The figures show an increase of 90 and 15 respectively. Mahomedans (195) formed 38 per cent of the total. There is accommodation for 334 at Matunga and 175 at Yeravda. The question of providing an additional dormitory at Matunga is before Government. The cost per head was Rs. 223 at Matunga, and Rs. 254 at Yeravda. In addition to instruction in the vernaculars, carpentry, painting, smithing, and gardening are taught at both the Institutions, as well as book-binding at Yeravda, and spinning and cane-weaving at Matunga. At Matunga 80 boys attended the Ruby Mills. At Yeravda 35 served out on licenses. The health and behaviour of the boys were good. The boys are weighed every fortnight and special diet is issued to those who lose weight. To stimulate emulation in work and behaviour prizes and gratuities are offered. Of the boys discharged during the preceding 3 or 4 years, 2·3 per cent were reconvicted; 65 per cent (76 per cent for Matunga and 32 per cent for Yeravda) were employed in industries taught at the schools. The Chairman of the Matunga Institution reports:— *Reformatory School*

"Attempts are always made to keep in touch with discharged boys. During the period under repor 76 boys were discharged. Many of them are known to have been employed in various Mills, Docks, Presses, and other places of business. The boys who came to the Institution belong to various castes and professions and many of them are from places very far from Bombay. So it is not always easy to follow their career. Some have gone to Sea and some to their Native Country. Boys who have no home or friends to go to avail themselves of the benefit of the Sheppard After-Care Auxiliary Home."

CHAPTER XVII

PRIVATE INSTITUTIONS

Private Institutions

122. A Private Institution is one which does not submit to inspection by the Department and does not submit returns. The figures given are thus only approximate and are chiefly based on hearsay report. The number of private institutions increased by 255 to 1,496, and that of pupils attending them by 13,835 to 44,827 including 9,213 girls. Mahomedans represented 47 per cent of the total. The increase in the number appears to be chiefly due to the Non-co-operation movement. Of the institutions, 124 with 3,695 pupils were "advanced", and 1,372, with 41,132 pupils, were "elementary". Sind had the largest number of institutions (592 for 8,742 pupils), and the Northern Division had the largest number of pupils (18,397 in 399 institutions). Pupils in private institutions formed 4·7 per cent of the total number under instruction.

Maktabs, Mulla Schools and Pathshalas

123. Information regarding Maktabs, Mulla Schools and Pathshalas is given in Appendix C.

CHAPTER XVIII

TEXT-BOOKS, LIBRARIES, PUBLICATIONS, VISUAL INSTRUCTION, ETC.

Text-Book Committee

124. The revised rules for the Text-Book Committees were sanctioned in June, 1920. These created a Provincial Text-Book Committee, with the Director of Public Instruction as President, for the consideration of books for use in secondary schools, and five Vernacular Text-Book Committees, with the Divisional Inspectors as Presidents, for the consideration of books in Marathi, Gujarati, Kanarese, Sindhi, and Urdu. The power of sanctioning books has been transferred by Government to these Committees. The number of books to be reviewed by the different committees is limited by the rule that no book, English or vernacular, will be placed before the committee unless an Inspector considers it suitable for Government schools or reports that an aided or recognized school desires to use it. The rules lay down that a book should be definitely sanctioned or rejected within 6 months of its submission. Two special committees have been appointed—one to revise the Sindhi Readers so as to make them more acceptable to Sindhi Mahomedans, and to revise the Readers of the Anjuman Himayat Islam, Lahore, so as to suit the requirements of purely Mahomedan schools, and the other to make Urdu translations of the Departmental Vernacular Readers with such additions and alterations as may be necessary to bring them into closer harmony with Mahomedan sentiment and diction. A consultative committee of Mahomedans, officials and non-officials, has also been appointed to which the translations made by the Urdu Translation Board are referred for opinion.

Publications

125. The total number of publications registered decreased by 247 to 2,754 (1,524 books, and 1,230 issues of periodicals). Of these, 2,659 were original works including 372 in English, and 80 in Indian classical languages, 19 republications, and 76 translations. Miscellaneous works (1,492) form more than half the total production. Next was Poetry with 413 books, followed by Religion (273).

Libraries

126. Registered public libraries increased by 19 to 261, 61 having been removed from and 80 newly added to the list.

Patronage

127. The expenditure on the encouragement of literature was Rs. 3,142-15-0. Besides this, Rs. 2,000 was paid as grants to various literary societies. Of these, the Gujarat Vernacular Society, which publishes useful books and conducts a literary Magazine—the 'Budhi Prakash'—may be mentioned. The society has 506 registered libraries and its own publications number 270. It administers 118 Trust Funds of an aggregate of nearly Rs. 3½ lakhs.

Visual Instruction

128. A new appointment of Deputy Educational Inspector for Visual Instruction was created. The Department has 97 magic lanterns, 23 of which are distributed among secondary schools, 12 among training institutions, and 62 among inspecting officers. There were 13,731 slides under circulation dealing with the following

topics :—History and Geography, Travel, Science, Hygiene, etc. A catalogue of the slides has been drawn up, and they are circulated in rotation to the various officers. 677 lectures were delivered during the year. The Elphinstone High School made the greatest use of the lantern. The District Training Schools, Surat and Ratnagiri, are specially commended for their lantern work. Mr. K. G. Gidvani, Deputy Educational Inspector, Hyderabad, delivered 82 lantern lectures in the course of his tours of inspection—an admirable record. The duties of the special officer are to organize the whole work, and to see and report to the Director that the system laid down is duly carried out. He tours the whole Presidency and gives lantern lectures in towns and villages. The number of aided schools that take advantage of the loan of the Departmental slides is steadily increasing. Some of them have expressed their willingness to contribute towards a collection of useful slides for Educational purposes.

P. LORY,
Acting Director of Public Instruction.

Office of the Director of Public Instruction,
Poona, 2nd December 1921.

APPENDIX A.

Results of the different Examinations of the University of Bombay held in the year 1920-21.

Nature of Examination.	Number of candidates.	Number of passes.			Total passes.	Percentage of total passes.
		I Class.	II Class.	III Class.

* The percentages required for 2 (a), 2 (b), 2 (c), are calculated from the figures given in Columns 27, 29 and 29, respectively, of General Table IV.
† The annual cost is calculated on the *direct* expenditure only. The average cost of educating each pupil is obtained by dividing the direct expenditure by the average number on the rolls monthly during the year.
‡ The average cost of each pupil in Local Fund and Municipal Schools is to be obtained from the figures given in General Table VII.
§ Fractions of a rupee should be omitted, except in the columns showing the average annual cost of educating each pupil.

British Districts of the Bombay Presidency at the end of the official year 1920-1921.

*The amount of imperial funds shown as provincial revenues in columns 2, 9, 16 and 27 which is expended upon institutions, etc., included in General Table III direct and not through the medium of provincial funds is Rs. 27,260. This is distributed under the following heads :—

Ordinary grant.	Drawing grant.	Scholarships.
Rs.	Rs.	Rs.
2,302 (a)	304 (g)	1,060 (h)
2,172 (b)		
674 (c)		
698 (d)		
19,500 (e)		
437 (f)		
Total ... Rs. 25,973		

† This amount includes the expenditure of Rs. 331 on the Cantonment Committee's A. V. School, Deesa Camp.

‡ This amount includes the expenditure of Rs. 2,451 on 5 Cantonment schools maintained by the Cantonment Committees, Bhinger (Ahmednagar), Ahmednagar Camp and Deesa Camp.

Note.—The figures in column 9 represent expenditure from purely provincial funds, those in column 10 that from purely Local Funds and those column 11 that from purely Municipal Funds.

Note.—Column 11 will contain the total of all depressed classes, whether Hindu, Muhammedan, Animistic, etc. The preceding columns and the total in column 10 will give the numbers of those belonging to the creeds or races specified exclusive of those who are regarded as depressed classes and hence shown in column 11. The grand total of columns 10 and 11 (as shown in column 12) together will accordingly equal the grand total of pupils shown in General Tables I and III.

(6)—*Results of the Prescribed Examinations in the British Districts of the Bombay Presidency during the official year 1920-1921.*

* The percentages required for 2 (a), 2 (b), 2 (c) are calculated from the figures given in columns 27, 28 and 29, respectively, of General Table IV.

† The annual cost is calculated on the *direct* expenditure only. The average cost of educating each pupil is obtained by dividing the direct expenditure by the average number on the rolls monthly during the year.

‡ The average cost of each pupil in Local Fund and Municipal Schools is to be obtained from the figures given in General Table VII.

§ Fractions of a rupee should be omitted, except in the columns showing the average annual cost of educating each pupil.

of the Bombay Presidency at the end of the official year 1920-1921.
